Kooliner (GC America)

Professional Pkg: 3oz. powder, 2oz. liquid, & accessories 10-11144

Procure Hard Reline (Keystone)

A great chairside dual care, hard reline composite. That can be added directly to a prepared denture. Mix material to impression like consistency, apply to denture, and fit at chairside

No heat processing, no methyl methacrylate, and no heat discomfort to oral tissue

The result gives a permanent reline with no thermally induced expansion or shrinkage

The composite has been formulated to absorb very little water, be impervious to bacterial build-up, and is color stable. ProCure packages the soft reline in 8 individual units in the professional kit

Kit: 8 units 10-21114

Bulk Kit: 25-30 units 10-21113

Soft Reline

COE-Soft (GC America)

Soft temporary liner for upper & lower dentures. Polymerizes in or out of the mouth in approximately 15min.

Professional Pkg: 6oz. Powder & 6oz. liquid 10-11126

Prestige Dental Products, Inc.

Tel: 877-772-3888

Procure Soft Reline (Keystone)

A great chairside, dual care, bonded & microfilled soft reline composite

The ProCure soft reline mixes into an easy-to-apply impression taking consistency that can be applied to a prepared denture. The denture is then fitted into the mouth for a one step, one appointment fitting.

The end results gives a long-lasting (**two years or better**) soft reline. ProCure packages the soft reline in 8 individual units in the professional kit or one bulk economy kit

Kit: 8 units 10-21111

Bulk Kit: 25-30 units 10-21112

Sofreliner (Tokuyama)

Sofreliner Tough is an addition -cured silicone material for relining dentures on patients that require relief on upper or lower, partial or full dentures.

With superb stain resistance, excellent adhesion to the denture, and superior tear resistance, Sofreliner Tough ensures patient satisfaction for up to 24 months. Available in two formulas below

Medium Kit: 54g cart., primer 10ml bottle, finishing points and accessories 10-11223

Finishing System Contains: Steel bur T x 1 small, finishing wheel x 5, mandrel Tx1 10-11219

Temporary Matrix Buttons

Matrix Buttons (Advantage)

In & out of the mouth in 30 seconds. Patented, proven, accurate timesaver system for making temporary crowns, splints or bridges

Half-yet-flexible thermoplastic softens in hot water or microwave and easily forms the button around the tooth to be prepped

Blow air to harden and remove

Quickly make custom temporary crowns. A bottle of separating medium, which aids in removing the temporary

72/box 10-88351

Acrylics

Temp Tabs - True Blue (All Dental Prodx)

Cost-effective, multi-functional flexible and accurate impressions: matrix for making temps, bite registration, implant placement stents, bite guards.

- Non-toxic
- Will not distort
- Stays blue for instant identification
- No taste or odor
- No mixing, quick & easy to use
- Heat with or without water
- Oval shape conforms fast to occlusal surface of 3 units

72/box 10-88361

High Spot Indicators

Dr. Thompson Color Transfer Applicators (Great Plains)

Designed with both the user and the patient in mind, these disposables applicators are used for making color transfers from irritated areas under full dentures, partial, etc.

Its positive action, plus the dispensing feature and ease to use, saves valuable time. And because it is sanitary, disposable and obviously painless, it is also a pleasant surprise to the patient. To obtain the best results, apply very lightly. This allows for the positive action with a minimum of smearing

Bottle 10-11128

Fit Checker Advanced (GC America)

Vinyl PolyEther silicone is not affected by saliva

- In-office adjustments

Pip Pressure Indicator Brushes

30gm, bottle 14-91771

PIP Pressure Indicator Paste (Mizzy)

The mizzy pressure indicating pastes are the standard in the dental industry for checking and fitting prosthetic devices.

PIP is the leading product for this important procedure. It is pure white silicone paste used for

seating crowns, bridge work and full, intermediate, and partial dentures. Using PIP yields a specific result that is easily read and thoroughly reliable, surpassing results obtained with other pastes such as chemical set materials.

2.25oz. = 64 grams/ jar & pip remover 10-12193

PIP Pressure Indicator Spray (Mizzy)

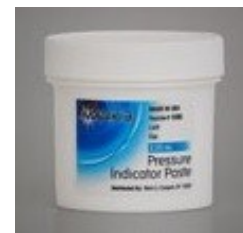

This mint flavored wetting agent is ideal to use with patients who have dry mouth or in cases where super accurate impressions are needed. Sprayed onto teeth and soft tissue, the PIP spray will yield a smooth, accurate, bubble free surface, perfect for all types of impression material. Available in ready-to-use spray bottles or in a concentrated solution
