Cements & Liners

Permanent Cements

GC FujiCem 2 Automix (GC America)

New high-elastic crosslinking monomers with a modified filler surface treatments that increases strength properties. High fluoride release, low film thickness, and excellent marginal integrity. Indicated for a broad array of indirect restorations (including all types of metal-, rein-, alumina-, and zirconia-based inlays, on lays, crowns, and bridges) The superior bond strength which allows extra time for completing more restorations. **Easy to use and stronger than ever.**

Refill: 2 x 7.2ml, 13.3g cartridges 21-46371
 Mixing tips, 20/Pkg 21-96731

Durelon (3M)

For use in cementing inlays, on lays, crowns, bridges and more. Carboxylate cement in a calibrated dispenser for cementing inlays, crowns, bridges, and more.

Triple Kit 3 x 20g powder & 40g liquid 21-11136
Triple Powder 3 x 20g 21-11134
Triple Liquid 40g 21-11133

Durelon CD (3M)

Polycarboxylate cement in a calibrated dispenser for cementing inlays, crowns, bridges, and more.

Triple Kit 40 gm liquid in 12 CD syringes, 60 gm powder and mixing pad 21-15349
CD Triple Liquid 40 gm liquid in 12 CD syringes 21-15350

Fuji Plus Capsules (GC America)

- Outstanding bond strength to tooth structure
- Long lasting restorations
- Sustained, rechargeable fluoride release
- Reduces risk of decay at tooth/casting interfaced

Refill Pkg of 50 capsules (yellow) 21-11152
 (powder 0.36 gm, liquid 18 gm/0.16 ml)
 per capsule

Applier - Metal (House Brand) 21-85591

Maxcem Elite (Kerr)

- Self-etch, self – adhesive cement.
- High bond strength without adhesive needed

Clear: 2 x 5gm dual syringes, 20 automix tips (10 regular, 10 wide) 21-98102

White: 2 x 5gm dual syringes, 20 automix tips (10 regular, 10 wide) 21-98101

Relyx Luting Cement (3M)

The first hybrid glass ionomer permanent cement to offer the important resin cement advantage of zero solubility and high fracture toughness

Intro Kit: 9 ml/11 gm liquid & 16 gm powder 21-11226

Relyx Luting Plus 2 Clicker (3M)

Resin modified glass ionomer cement for metal, all-alumina and all-zirconia ceramic indications. A hybrid glass ionomer permanent cement that is fast setting, strong and easy to use

Refill. Contains: 2-11g RelyX Luting Cement in Clicker Dispensers and instructions for use. 21-11227

Relyx Unicem 2 Cement Clicker (3M)

Adhesive resin cement formula with easy-to-use delivery systems that deliver optimal consistency & reduced waste

A2 1 - 11 g, clicker dispenser and 1 mix pad 21-105531

Transparent 1 - 11 g, clicker dispenser and 1 mix pad 21-105532

Cements & Liners

Accolade PV Veneer Cement (Danville)

Accolade PV is a complete veneer application system designed by a major lecturer & clinician. Six shades included in the kit satisfy nearly all situations. Accolade is highly thixotropic so it adapts readily but does not slump. Excellent polish and wear resistance.

Features

- Revolutionary try-in composites
- Developed by leading clinician
- Complete kit with try-in and matching cementing composites, adhesive & silane.

Kit w/ try-in paste contains: 4-composite 23-90281 and try-in pastes, (translucent, light, extra light, and white opaquer), 5gm-prelude adhesive & 5ml - S bond silane, wells

Veneer translucent shade flowable, 23-90282
5gm. Sy.

Veneer shade flowable light, 3gm. Sy. 23-90283

Veneer shade flowable white opaque, 23-90284
3gm. Sy.

Veneer shade flowable brown, 3gm. Sy. 23-90285

Veneer shade flowable yellow, 3gm. Sy. 23-90286

Try-in paste translucent, 5gm. Sy. 23-90287

Try-in paste light, 3gm. Sy. 23-90288

Try-in paste x-light, 3gm. Sy. 23-90289

Try-in paste white opaque, 3gm. Sy. 23-90290

Try-in paste yellow, 3gm. Sy. 23-90291

Try-in paste brown, 5gm. Sy. 23-90292

Activa BioActive Cement (Pulpdent)

Stimulates mineral apatite formation and the natural remineralization process at the material-tooth interface that knits together the restoration and the tooth, penetrates and fills micro gaps, reduces sensitivity, guards against secondary caries, and seals against microleakage and failure - nature's way.

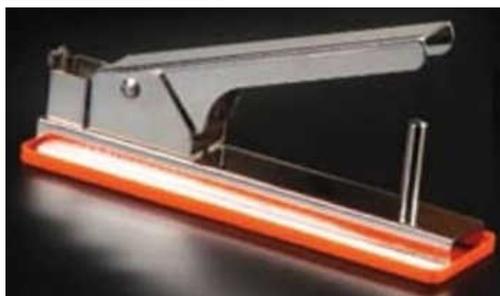

Translucent Single Pack (7gm) Contains: 21-110481
5ml/7gm syringe, translucent shade, + 20 automix tips (15 straight black + 5 w/ bendable metal cannula)

Translucent Value Pack (2x7gm) Contains: 21-110482
5ml/7gm syringe, translucent shade, + 40 automix tips (30 straight black + 10 w/ bendable metal cannula)

Single Pack A2 (7gm) Contains: 5ml/7gm 21-110483
syringe, A2 opaque shade, + 20 automix tips (15 straight black + 5 w/ bendable metal cannula)

Value Pack A2 (2x7gm) Contains: 5ml/7gm 21-110484
syringe, A2 opaque shade, + 40 automix tips (30 straight black + 10 w/ bendable metal cannula)

Activator For 3M Aplicap

Each

21-108931

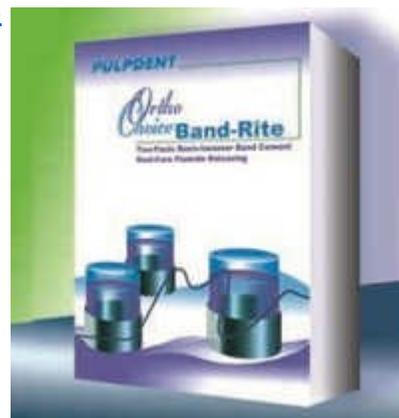

Band-Rite (PulpDent)

Provides easy mixing and handling, long working time, maximum visibility for seating bands in the mouth. Fast clean up, and both light cure and self-cure options

Features

- Does not flow out when loading bands
- Easy removal of excess improves visibility of occlusal surfaces when seating bands
- After setting, excess flicks off cleanly like a thin veneer
- High bond strength reduces wash out and decalcification

Kit: 22.8gm base, 25.2gm catalyst, mixing 44-11422
pad, spatulas

Bistite II DC (Tokuyama)

BISTITE® IIDC is a self-etching, dual-cured adhesive resin cement system with excellent handling and adhesive properties. DC Kit is designed and manufactured for cementation of precious and non-precious metal, ceramics, porcelain, cured composite crowns, inlays, onlays, bridges & veneers

Prestige Dental Products, Inc.

C&B Metabond Quick Adhesive Luting Cement (Parkell)

- For bonding metal to dentin or enamel
 - Bonds to all alloys and tooth structure

Complete Kit: Enamel each, dentin activator, base, catalyst, clear powder, tooth-shade powder, ceramic mix dish, brushes	21-98671
C&B Metabond Base , 10ml	21-98672
Tooth Shade Powder , 5gm	21-98673

Clearfil DC Bond (Kuraray)

Is a versatile self-etching, single step, dual-cure dental adhesive that provides reduces postoperative sensitivity, durable bond strength for indirect and direct restorations, along with being very easy and fast use.

Features & Benefits

- Low post-operative sensitivity
- Fast and simple procedure; no rinsing, no shaking, no scrubbing, and no layering necessary
- High bond strength and durability
- Self or dual cure resins available

- Thin film thickness; 5-10 microns
- | | |

Durelon Maxicap (3M)

This fluoride-releasing, carboxylate luting cement attains a relatively neutral pH value that reduces post-cementation sensitivity, while its unique capsule delivery offers automatic mixing and dispensing. Refill includes 20 maxicap capsules of Durelon cement.

Refill Pkg, 20 capsules 21-11138

Elongation Tips

Bag of 10pcs 21-106771

Embrace Automix WetBond Resin Cement (PulpDent)

All-surface, one-step cementation self-adhesive, moisture tolerant, self-etching to Dentin. No bonding agents required. Used for cementation of PFM, gold, CEREC and reinforced ceramics for crown and bridge; gold, metal and fiber posts; and inlays

- Unique embrace technology bonds to the moist tooth
- Margin-free, tooth integrating, eliminates microleakage
- Low film thickness: 12 microns
- Self-etching to Dentin
- Self-adhesive: no primers, no silane, no bonding agents required
- Color stable when cured
- Your choice of low or medium viscosity.

Low Viscosity Kit: 7gm cement, 20 automix tips 1.2ml each, seal-n-shine & OxOut, accessories 21-11141

Glass Ionomer Cements (Prime Dental)

An advanced formulation designed as a multi-purpose final cement for the cementation of crowns, bridges, inlays and onlays, as well as certain orthodontic applications. The cement chemically bonds to enamel, dentin and metal structures. Ideal for use as a liner under composite, amalgam or porcelain restorations where a thin lining is indicated. The cement is radiopaque and has cariostatic properties by naturally releasing fluoride

Kit: 18g powder bottle, 17.5ml liquid bottle, measuring scoop, mixing pad & IFU 21-11154

Ketac Cem Aplicap (3M)

Permanent glass ionomer luting cement, offers fluoride release, optimal fit and marginal integrity.
 - Very low film thickness

Refill, 50 capsules

21-11163

Ketac Cem Maxicap (3M)

Permanent glass ionomer luting cement offers fluoride release, optimal fit and marginal integrity. Supply sufficient cement of most cases

Cements & Liners

Ketac Cem Radiopaque (3M)

Permanent glass ionomer luting cement for crowns, bridges, post, inlays, onlays, and orthodontic bands. Adheres to both tooth structure and metal oxides with no conditioning for an easier technique than hybrid cements. Outstanding adhesion to dentin has been demonstrated compared to currently available compomer and composite luting cements. Ketac-Cem exhibits high compressive flexural strength to stand firm under pressure.

- High radiopacity (230%) ensures easy detection.

Intro Kit: 12ml liquid, 33gm powder 21-26431

Triple Pack: 36ml liquid, 99gm powder & mixing pad 21-26432

Powder, 33gm 21-26433

Liquid, 12ml 21-26434

3M Mixing Pad 3 x 3, 100/Pkg 21-26435

Kleer Veneer Cement (PulpDent)

Kleer veneer is a one-of-a-kind, moisture tolerant, self-adhesive veneer cement. No bonding agents are required on enamel, nor is silane required on ceramic. Etching and bonding to dentin is indicated. The clear shade is clear before and after curing for accurate visualization of shade and esthetics after try-in with water. Unique consistency holds veneers in place without drift prior to curing.

1.2ml syringe, clear shade 21-11175

Luting Cement DC(Prime Dental)

Auto-mix system, dual cure, filled multipurpose permanent cement, for use in final cementations of implant prosthesis, crown and bridges, inlays, onlays, veneers, cementation of post & pins and periodontal splinting.

Physical Properties

- Working time: **2 minutes**
- Setting time: **5 minutes**
- Compressive Strength: **266MPa**
- Flexural Strength: **133 MPa**

A2 Contains: 1 x 10g syringe, 7 mixing tips, 7 intra oral trips & IFU 21-11181

Blue Contains: 1 x 10g syringe, 7 mixing tips, 7 intra oral tips & IFU 21-11179

White/Opaque Contains: 1 x 10g syringe, 7 mixing tips, 7 intra oral tips & IFU 21-11182

Panavia 21 Adhesive (Kuraray)

A dental adhesive with a specifically developed ED Primer. Allows for a one-step direct bonding of metal, silanated porcelain or cured composite to dentin and cut enamel without acid etching or post operative sensitivity

Standard Kit/EX (White) Contains: 21-90641
 15.2gm paste, 4ml each ED primer liquid A & B, 6ml oxyguard 2 and accessories

Standard Kit/TC (Tooth Color) Contains: 21-90642
 15.2gm paste, 4ml each ED primer liquid A & B, 6ml oxyguard 2 and accessories

Standard Kit/OP (Opaque) Contains: 21-90643

 1 catalyst paste 4ml & I universal paste 4ml

Panavia F2.0 Cement (Kuraray)

A self-etching, self-adhesive, dual-cure, fluoride releasing resin cement that can be cured with any halogen, plasma ARC or LED light - contains the same, proprietary MDP adhesive monomer that has been proven with over 20 years of clinical use.

Features & Benefits

- Ideal for any procedure with any curing light
- **NEW** self-etching primer
- Legendary desensitizing
- Strongest bond to metal-oxide ceramics
- MDP self-adhesive monomer

Polycarboxylate Cement (Prime Dental)

Used primarily for final
 cementation of crowns and
 bridges. This luting cement has
 good biocompatibility, a low film
 thickness of 13-18 microns and
 good insulating characteristic. The
 material of choice for sensitive
 teeth and for preparations close to
 the pulp.

Kit: 32g powder bottle, 17.5ml liquid 21-11224
 bottle, measuring scoop, spatula, mixing
 pad & IFU

Universal Shade Kit, Contains: 4gm base + 4gm catalyst 21-11232

Retrieve Implant Cement (Parkell)

Provides long-term cementation of restoration to implant abutment. Convenient gel stage after two minutes for easy clean-up around the margins

- Easy Clean-Up
- Convenient Size Cartridge

5ml cartridge + 10 mixing tips 36-106701

Riva Luting & Luting Plus (SDI)

Self-curing, glass ionomer luting cement designed for final cementation of metal-based restorations. It chemically bonds to metal substrates and the tooth. Riva Luting Plus chemically bonds to dentin, enamel and all types of core material.

Caps, 50/box 21-16801

Resin Modified Glass Ionomer Luting Crème Caps, 50/box 21-16802

Set PP Capsules Resin Cement (SDI)

Designed for final cementation of metal, resin, all ceramic and ceramic based restoratives. seT chemically bonds to tooth structure and all types of core material.

- Fluoride releasing
- Hardens in 5 minutes by itself
- Water resistant in the cured state
- Contains fillers that give it good radiopacity
- Maintains its anatomical form
- The material is rapidly equilibrates to a stable marginally positive weight

Standard A1, 50 capsules 21-16811

Universal A2, 50 capsules 21-16812

Opaque White, 50 capsules 21-16814

Translucent, 50 capsules 21-16815

Set PP Syringes Resin Cement (SDI)

A self etching, self adhesive, resin cement, designed for final cementation of metal, resin, all ceramic and ceramic based restoratives.

SET chemically bonds to tooth structure and all types of core material. seT is available in capsules and a paste/paste automix syringe system (seT PP).

Assorted, Kit: 5 syringes 21-16821

Mixing Tips, 50/pack 21-16822

StarFill 2B (Danville)

Dual-cure composite is ideal where composite is inaccessible to light. Dual-cure chemistry allows fast set with a light or self-cures intraorally in approximately 2½ minutes. Flowability allows easy adaptation. As a cavity liner, shrinkage occurs towards the tooth. Excellent for luting crowns, posts and opaque veneers where light-cure is questionable.

Automix Kit, Dual Cure Composite, Contains: 10gm automix syringe & 6 mixing tips 21-11233

Automix Straight Tips, pkg of 48 21-11234

Starfill 2B Bendable Tips 21-11235

Cements & Liners

Tuff-Temp Plus (PulpDent)

Strong, impact resistant rubberized-urethane doesn't shrink or distort and grips the tooth tightly. Virtually eliminates fractures and debonding. Grinds and powders during trimming without softening or distorting. Margins are perfect.

- Tough, tight fitting and impact resistant
- Dimensionally stable
- Grips teeth securely
- Virtually eliminates fractures and cementation failures
- Does not soften and distort when trimming
- Grinds and powders for perfect margins
- Doesn't gum up finishing instruments
- Automix cartridge system
- Self-cure with fast light cure option

Temporary Filling Material

IRM Ivory (Caulk)

IRM (Intermediate Restorative Material) is designed for intermediate restorations intended to remain in place for up to one year. The eugenol content in the polymer reinforced zinc oxide-eugenol composition gives the material sedative like qualities on hypersensitive tooth pulp and is a good thermal insulator as well.

Complete Pack, Contains: 38gm powder & 14ml liquid	21-11160
Liquid, 14ml	21-11162

Powder, 38gm

21-11161

Cavit (3M)

A self-cure temporary sealing compound for the temporary restoration of cavities. Cavit G Temporary Filling Material, which can be removed completely with burs, is intended for inlay preparations.

Applications

- Temporary restorations, especially inlay preparations
- Temporary fillings
- Filling implant sites
- Relining temporary prefabricated crowns & bridges

Benefits

- High viscosity makes it ideal for the temporary restoration of cavities, especially inlay preparations.
- Offers superb handling: packs and carve with no stringiness.
- Fast: light cures up to 7mm layer thickness
- Reliably strong: dimensionally stable restorations virtually eliminate premature loss and annoying emergency calls

Cavit G, 28gm jar

21-11124

Coltosol F (Coltene-Whaledent)

- Provisional filling material
- No light curing is needed
- Non-eugenol
- Smooth consistency for controlled application
- No mixing
- Fast setting
- Easy to remove
- Contains fluoride
- Distinctive bright white color
- Radiopaque
- Superb marginal adaptation
- For placement in Class I & Class II indications

5-8gm, syringes

21-91832

DuoTEMP (Coltene-Whaledent)

DuoTEMP is a dual-cured temporary filling material. It is a white-colored material that is eugenol-free, radiopaque and is formulated from zinc oxide and zinc sulphate for optimal protection from the infiltration of bacteria. DuoTEMP

can be cured using both light and saliva. After only 40s of light curing the patient can immediately load the material. DuoTEMP guarantees an outstanding marginal seal due to its slight expansion using only one material, which has been designed for multiple indications. Its pleasant flavor and natural tooth-like feeling help optimize patient comfort during the temporization procedure. DuoTEMP's single-component material does not require mixing for easy, time saving application. It also delivers sufficient retention in the cavity; and is easy to remove

Single Pack, 1 x 5g syringe

Cements & Liners

Economy Pack, 5 x 5g syringe 21-91842

Interval (Temrex)

Zinc oxide/
 eugenol based
 temporary
 filling material
 dispensed by
 syringe

**1 - precision screw plunger syringe 3 -
 6.5gm refill bars** 21-94391

IRM Caps (Caulk)

Standard Pack, 50 - 0.34gm caps 21-11159

Trm Temporary Filling Material (HB)

Setting time of >4 min <10
 min and this is according to
 ISO specification

Kit: 38gm powder, 14ml liquid 21-105411

Zinc Oxide Eugenol Cement Reinforced Material (Prime Dental)

This material is a
 non-irritating
 formulation for the
 temporary
 cementation of
 crowns and
 bridges

**Kit: 50g powder jar, 15ml liquid bottle,
 and accessories** 21-11250

Temporary C&B Cements

TempBond (Kerr)

A temporary cement for trial
 cementing restorations or
 cementing temporary crowns and
 bridges. TempBond withstands
 mastication, seals the restoration
 and prevents seepage, yet affords
 easy removal when desired

Standard Pack: base & accelerator 21-11238

Cavex Temporary Cement

- Eugenol free temporary cement
- Easy to distinguish
- Ideal characteristics for use as a temporary cementation material
- Comes in plastic tubes

Made in Holland

**Kit: 25g base, 16g catalyst, & 1 mixing
 pad** 21-109661

NexTemp NE Automix (Premier)

Features & Benefits

- Resin-Matrix formulation good marginal seal with no wash-out
- Two-stage curing-initial gel-set stabilizes temporary, allowing easy removal of excess
- Eugenol free non-irritating to soft tissue/will not inhibit permanent cementation
- Fluoride release-protects tooth structure
- Potassium nitrate-reduces sensitivity
- Chlorhexidine-Anti-Bacterial
- Automix syringe saves application time/ guarantees consistent mix
- Neutral shade-blends esthetically with temporary restoration/no show through
- Firm retention/easy removal-no costly re-cementing and convenient removal save time

**Standard Kit: 1-5ml automix dual barrel
 syringe & 10 mixing tips** 21-91861

**Bulk Pack: 4-5ml automix dual barrel
 syringe** 21-91862

Automix Mixing Tips, 25/pkg 21-91863

Cements & Liners

Nu Form Temporary Crown & Bridge Material (Nu Radiance)

Nu Form is a self-curing resin based composition designed for easy fabrication of temporary crowns and bridges. It sets in two stages, providing for easy working. Curing is complete in four minutes with initial set in 90 seconds. For making repairs, Nu form is compatible with self and light cure resin based materials.

Features

- Initial set 70 seconds
- Final set 4.0 minutes
- Phenomenally tough
- High resistances to impact
- Fluorescence assures good appearance in all lighting conditions
- Minimal oxygen inhibited layer
- Easy to polish
- Transient flexibility, provides ease of handling

Nu Form Kit: 50ml of material in an automix cartridge 1:1, 15 mixing tips & instructions. (works w/ regular 1:1 dispensers) shade bleach 21-11218

Shade A1, 50ml cartridge 21-11217

Shade A1/B1, 50ml cartridge 21-11216

Shade A2, 50ml cartridge 21-11215

Shade A3, 50ml cartridge 21-11214

Shade C2, 50ml cartridge 21-11213

Dispensing Tips, 50 blue mixing tips per bag 21-11212

50ml Dispenser, (1:1/2:1) 21-11211

Replacement Slides for Dispenser, 2/pkg 21-11219

Opotow Temporary Cement (Waterpik)

Excellent as a sealer during endodontic procedures. Designed for luting of cast crowns and bridges on a semi-permanent basis as well as for temporary cementation where prolonged evaluation is required.

Complete Kit: 1.25oz. (35g) accelerator (A tube), 2.5oz (70g), base (B tube), mixing pad, tube key 21-91871

PacTemp Automix NE (Pac-Dent)

Non-eugenol temporary cement automix

Standard Pack: 1 x 6ml dual barrel automix syringe & 10 mixing tips 21-11222

Mixing Tips Brown, 30/pkg 21-11221

Proviscell (Septodont)

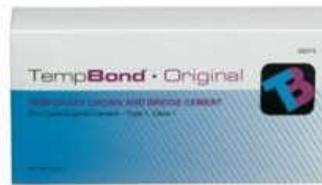

Kit: 1 x 87oz tube of base, 1 x 87oz tube of catalyst, 1 mixing pad 21-91881

Tempbond Automix (Kerr)

Temporary cement for trial cementing restorations or cementing temporary crowns and bridges

2 syringes, 11.8g each, 20 mixing tips 21-91931

Tempbond Clear (Kerr)

A resin-based, translucent provisional cement, ensuring superior esthetics. It offers a dual-core for added security and flexibility ease of handling, excellent mechanical retention, and easy removal from preparations. Indicated for cementation of temporary and provisional restorations such as crowns, bridges, inlays, and onlays

1 x 7g. Syringe, and 10 mixing tips 21-91941

Automix Tip Refill, pkg of 50 tips 21-91942

Tempbond NE (Kerr)

A non-eugenol temporary cement that will not inhibit the polymerization of permanent resin cement and acrylic temporaries. Resin based.

Standard Pack 21-11239

Prestige Dental Products, Inc.

Cements & Liners

TempBond Unidose (Kerr)

A temporary cement for trial cementing restorations or cementing temporary crowns and bridges. It flows easily allowing complete seating of the restoration. TempBond with stands mastication, seals the restoration and prevents seepage, yet affords easy removal when desired.

50 Unidose Packets, 2.4gm each, & mixing pad

21-11237

1:1 Package Contains: 10gm powder, 21-11149
 6.8gm liquid & measuring scoop

Fuji Lining LC Paste Pak (GC America)

- Radiopaque light cured glass ionomer lining cement
 - The first light-cured glass ionomer lining material available in a paste-posts formula

Refill, Paste Pak Cartridge 7.0g, (4.7ml) 21-11151

Cavity Liners

Activa BioActive Base-Liner (Pulpdent)

- Tough, resilient, resists chipping and crumbling.
 - Releases & recharges calcium, phosphate & fluoride chemically bonds/ seals against bacterial microleakage
 - No sensitivity - no bonding agents required
 - Moisture tolerant - simplified technique

Single Pack Contains: 5ml/7gm syringe 21-110491
 + 20 automix tips w/ bendable 20-gauge metal cannula

Value Pack Contains: 2 x 5ml/7gm 21-110492
 syringe + 40 automix tips w/ bendable 20-gauge metal cannula

Interface Cavity Liner & Base (Temrex)

- Light-cure cavity liner containing calcium hydroxyapatite and fluoride. Can be used with all restoratives

White Opaque, 10gm, syringe 21-90581

Lime-Lite (Pulpdent)

Contains hydroxyapatite in a urethane dimethacrylate resin fluoride-releasing-radiopaque-tooth shade. Specially formulated for use with adhesives, composites and conventional restorative materials. Releases favorable calcium, hydroxyl, fluoride and phosphate ions. These are known to be beneficial to tooth structure, to stimulate secondary dentin formation and to have cariostatic properties

Kit: 4 x 1.2ml syringes + 8 applicator tips 21-11178

Barrier Dentin Sealant (Water Pik)

Radiopaque calcium hydroxide composition rigid, self-setting material for pulp capping.

Standard Kit Contains: 15ml dentin sealant, disposable applicator brushes 21-91801

Pipettes, bag of 50 21-91802

Multi-Cal (Pulpdent)

A smooth, creamy calcium hydroxide preparation recommended for all clinical applications where calcium hydroxide is indicated.

- Temporary & intermediate root canal therapy
 - Direct pulp capping, pulpal curettage, pulpotomy
 - Dentin bridge formation
 - Cavity lining and indirect pulp capping

Standard Kit: 4 x 1.2ml syringes + 8 applicator tips 29-12239

Fuji Lining Cement LC (GC America)

- Light cured glass ionomer cement for lining
 - Radiopaque and fluoride releasing
 - Permanent & durable for all type of restorations

Cements & Liners

VitreBond (3M)

- Fast technique & excellent handling characteristics allows for quick and easy placement.
- Forms a strong bond to dentin, sealing the tooth to reduce the incidence of microleakage which helps reduce post-operative sensitivity.
- Produces zones of inhibition against bacteria commonly found in the oral cavity in vitro
- Sustained fluoride release to help protect the tooth long after the restoration is complete

Intro Kit: 9gm liner/base powder, 5.5ml base/liquid, mixing spoon, & pads 21-11248

9gm Powder (liner/base) 21-11246

5.5ml (base/liquid) 21-11247

VitreBond Plus Double Clickers (3M)

- Faster, easier, dispensing and the right mix every time
- Conventional paste-liquid formula offers the protection of a conventional glass ionomer liner w/o the mess of measuring
- **Award-winning** clicker dispenser assures a consistent mix
- Help protect against post-op sensitivity: offers a strong bond to dentin, sealing the tooth structure to protect against microleakage
- **Cures in 20 seconds** - a faster cure time than powder-liquid formulas
- Delivers **excellent** adhesion with any dental adhesive system

Double Pack: 2-10gm, clicker dispensers, 1 large mixing pad, 1 technique card, & instructions 21-11249

Cavity Varnishes

Copal Plas Cavity Varnish (Prime Dental)

- Insulates against thermal and electric shock
- Provides a strong bond between dentin & restoration
- Chloroform free formula of varnish & sealant

15ml, bottle

21-11129

Copal Varnish Solvent (Prime Dental)

- Insulates against thermal and electric shock
- Provides a strong bond between dentin & restoration
- Chloroform free formula of varnish & sealant

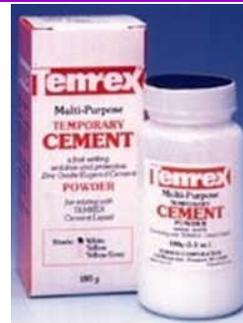

15ml, bottle

21-11130

ZOE Cements

Temrex Cement (Temrex)

- Multi-purpose cement powder
- Fast setting sedative protective ZOE cement

White Powder, 100gm 21-91891

Yellow Powder, 100gm 21-91892

Liquid, 4oz 21-91894

White Powder, 1lb 21-91896

Yellow Powder, 1lb 21-91897

Temrex CR (Temrex)

- A non-eugenol, zinc-oxide-based temporary cement in automixing syringe
- Reliable: holds dependably b/w visits
 - Controlled retention: easy to remove
 - Auto-mixed: even mixture, minimal waste
 - Compatible with all permanent cements
 - Strong marginal seal protects the prepared tooth
 - Radiopaque
 - 70 seconds minimum working time, 5 minutes maximum setting time

Contains: 1 x 7g auto-mix dual syringe, 15 mixing tips, 1 syringe of releasing agent 21-91901

Surgical Cements

COE-Pak (GC America)

Periodontal dressing, regular set is ready in 3 minutes, hard & fast set is ready in **1 minute**

Regular Set: 90gm 21-11127
each base & Catalyst

Hard/Fast Set: 21-11128
90gm each base & Catalyst

Cements & Liners

Perio-Care Periodontal Dressing (Pulpdent)

A **highly elastic** periodontal dressing that sets resiliently hard and does not chip or fall apart in the mouth. Provides durable post surgical protection to tissues

- 7 minutes working time; sets in 15 minutes
- Neutral odor and taste
- Contains no eugenol

Standard Pack Contains: 3oz tube paste, 21-11223
 3oz tube gel & mixing pad

Desensitizers

Hurriseal Desensitizer (Beutlich)

- Antimicrobial, water-based solution
- Eliminates dentinal bacteria and reduces hypersensitivity when used after etching & before priming
- Easy, one-step application

12ml, bottle

21-108111

MicroPrime Desensitizer (Danville)

Eliminates post-op sensitivity and discomfort from cervical erosions. Proven HEMA formulation reliably plugs tubules. Compatible with all total-etch bonding systems, cements and amalgam. MicroPrime is now available in two formulations: original MicroPrime B, proven effective for nearly 10 years and new MicroPrime G, which is an equivalent formula to Gluma* (at a far lower price). MicroPrime G also serves as an ideal antimicrobial when used with self etch adhesives

MicroPrime G Gluma* equivalent formula, 35% HEMA, & 5% glutaraldehyde, 10ml bottle

21-11199

MicroPrime B, 35% HEMA, fluoride & benzathonium chloride, gentle on the soft tissue, 10ml bottle

Pain-Free Gel Dentin Desensitizer (Parkell)

- Gel consistency allows accurate placement and no running
- **Relief w/ seconds**
- Easy, no mess dispensing
- The unique tripolymer formula for effective, long-term results

Contains: 3ml syringes, 30 needle nose intraoral applicator tips 21-131441

Drying Agents

Cavidry (Parkell)

- Rapid cleaning & degreasing of tooth preparations
- Evaporates moisture and dissolves hard-to-remove contaminants that can compromise your cementation procedures
- Quickly removes ZOE, oils, and other lubricants that can't be washed off with your 3-way syringe
- Ideal for enamel and metal cleaning prior to acid-etch bonding or cementing
- Evaporates in seconds. Leaves no residue that is incompatible with filling or lining materials that may follow
- Removes hardened ZOE cement from crowns, bridges, or even slabs and spatulas

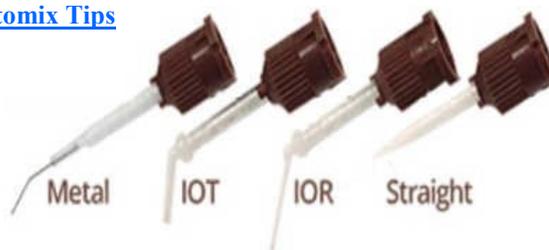

4oz, bottle

21-91921
