Operator Chairs & Packages- Flight Dental

Prestige Dental Products, Inc.
Tel: 877-772-3888

A10 Operator System (Flight Dental)

Item# 30-11117

The A10 is one of our premium packages featuring a large doctor work surface and the elegant one-piece cuspidor. The generous size of the A10 will accommodate your largest patients comfortably while providing ideal working access for the doctor and assistant.

- Combine with your choice of A6 or A10 patient chair
- 3 Handpiece automatic control with air/water syringe
- Rotating utility center with one piece cuspidor
- Adjustable timer setting for bowl rinse and cup fill
- Unit mounted treatment light with two intensity settings
- Touchpad control for doctor and assistant controls chair, light, cuspidor and bowl rinse
- Choose from large or compact doctor's handpiece control
- City/Closed water system standard on all units
- Foot controls handpieces and offers water on/off toggle and chip air blower

A12 Operator System (Flight Dental)

Item# 30-11123

A12H Hydraulic Lift Chair is integrated with cutting edge technology improving patient and doctor comfort. This new ergonomically designed chair provides unparalleled comfort and functionality for the dentist, making it the perfect chair for any dental operatory.

The exceptional range of motion coupled with its durability and sensible value, is the result of the perfect union between man and space. Hydraulic motor with 380mm as the lowest position capability of the chair.

Dual 180 rotatable arms allows for convenient placement of cuspidor and tray units for doctor and assistant.

Left-hand and right-hand capability optimizes efficiency and space for doctor and patient. New designed dental light providing superb luminosity.

Thin backrest provides the optimal space and access for the dentist and close positioning to the patient.

12 seamless or plush upholstery colors.

4 programmable chair position settings to make the work more efficient for the dentist.

Synchronized backrest and seat movements to provide the most comfortable patient seating

Optional LCD monitor mount, Optional G.Comm LED Light.

A2 Operator System (Flight Dental)

Item# 30-11130

The A2 chair is the most economical chair in our line of products. The backbone to a reliable chair is contingent on both the engineering and quality of the materials used. The chair is produced using some of the highest standards and as such has received praise as one of the best chairs on the market. Furthermore, the entire unit is finished using a Powder-coated baked finish to enable the highest level of asepsis control and with a cast iron frame the chair provides excellent durability. The company continues to exceed expectations, satisfying customer's desire for an economically priced unit built using the highest standards.

- Combine with the A2 patient chair
- 3 way air/water syringe with fully autoclavable tips
- Rotating one piece cuspidor
- Automatic bowl rinse and timed-cup fill functions accessible by patient and assistant side
- Unit mounted treatment light with two intensity settings
- Touchpad control of patient chair for doctor and assistant
- Choose from large or compact doctor's handpiece control
- City/Closed water system standard on all units
- Foot controls handpieces and offers water on/off toggle and chip air blower
- 12 seamless and plush upholstery colors

A3 Operator System (Flight dental)

Item# 30-11132

The A3 is Flight Dental's economy chair with a European inspired design. The workmanship seen on this chair is incomparable in the marketplace today, and has been one of Flight Dental's most successful endeavours. It combines versatility, aesthetics and superior quality to produce an operator package that is suitable for hygienists and dentists alike. The chair is built with the patient and dentist in mind, with its thin backrest and ergonomically correct seat positioning, it produces the ultimate synergy between man and environment.

- 3 Handpiece automatic control with air/water syringe
- Utility center with one piece rotating unique coloured glass bowl cuspidor
- Adjustable timer setting for bowl rinse and cup fill
- Unit mounted treatment light with two intensity settings
- Touchpad control for doctor and assistant controls chair, light, cuspidor and bowl rinse
- Choose from large or compact doctor's handpiece control
- City/Closed water system standard on all units
- Foot controls handpieces and offers water on/off toggle and chip air blower

Clesta Dental Lights

Item# 30-92521

Clesta dental lights continue as one of the most popular and innovative lights in the dental marketplace. Lights feature a 5000°K color temperature range setting that approximates mid-day sunlight, touchless ON/OFF sensor feature which minimizes potential cross-contamination that can occur as a result of contact with the light between procedures.

Clesta dental lights are available in unit mounted curved post or straight post versions or as wall, ceiling, track and cabinet mounted versions

Standard Features:

- . 3" x 8" oval pattern of illumination w/ feathered edges to minimize eye fatigue.
- . Each light equipped with touchless ON/OFF and manual over-ride switches.
- . Rotary selector for choosing high intensity (2,600 FTC), medium intensity (2,000 FTC) and composite safe mode (740 FTC).
- . Light color temperature range is 4600°K-5000°K
- . Ceiling and track mounted versions available for operatories with ceiling heights of between 8 feet and 10 feet

ECO-Sys Dental Light

ECO-Sys dental lights are the high quality, economical lighting solution - perfect for every dental practice

ECO-Sys dental lights are available in unit, ceiling and track mounted versions

Standard Features:

- . 3.3" x 8.7" oval pattern of illumination with feathered edges to minimize eye fatigue
- . Selector switch for choosing high intensity (2,600 FTC), low intensity (1,670 FTC) and composite mode (740 FTC).
- . Light color temperature range is 4200°K (high), 4000°K (low) and 3600°K (composite)
- . Ceiling and track mounted versions available for operatories with ceiling heights of between 8 feet and 10 feet

Eva Digital X-Ray Sensor (Dent-X)

EVA Dental is a filmless, digital dental imaging radiology system that produces highest resolution, diagnostic quality images. Utilizing patented "Active Column" CMOS technology, EVA produces high efficiency, low noise images which are digitized and transmitted to your computer via a standard USB (Universal Serial Bus) port and is compatible with laptop or desktop systems.

Easy-to-use, state-of-the-art digital imaging eliminates the inconvenience of film processing and the 3 to 6 minute wait for a single X-Ray. Patient archiving is fast and simple for patient data base archives. EVA interfaces with Dent-X ProImage or other image and practice management software suites. The operational simplicity of digital radiography consolidates workflow as it builds productivity.

REX Dental Digital X-Ray Sensor

Direct to USB

Direct to USB connection eliminates the need for a bulky control box

REX²

Digital Intraoral Sensor

2 Sizes Available

Specifications	Size 1 (600 mm ²)	Size 2 (900 mm ²)
Pixel Size	19 µm x 19 µm	
Pixel Pitch	19 µm in both directions	
Area Array Size	19.95 mm x 30.02 mm	36.00 mm x 25.99 mm
Number of Lines	1580	1896
Number of Columns	1050	1368
Cut Corners (front Side)	130 pixels	235 pixels
Cut Corners (back side)	53 pixels	137 pixels
Cable Outer Material	polyurethane	
Cable Length	3 m +/- 6 cm	

This sensor is designed with the most innovative features including unique grooves, and easy-to-use sensor holder system with high-resolution

Connection eliminates the need for a bulky control box

Size 1	30-97131	4995.00
Size 2	30-97132	5395.00

RXDC eXTend X-Ray Unit (MyRay)

We pleased to announce the eXTend DC x-ray unit is now available for sale. The intra-oral DC market is extremely competitive when it comes to pricing, and the eXTend allows MyRay to be much more competitive.

Simple wireless control

One handheld wireless digital control device allows you to program the unit from wherever you are in the surgery. There are no other wall-mounted or wired control panels to worry about. Easy-to-use and easy-to-handle, the control device offers a full range of intuitive exposure scenarios designed to make correct X-ray acquisition a straight-forward process.

No more complex programming or button-crowded panels. RXDC defines automatically the correct exposure by selecting the region of interest.

Hyperion X7 Panoramic Imager Morphology Recognition Technology (MyRay)

Panoramic Imager with Morphology Recognition Technology (MRT)

Hyperion is a highly-advanced panoramic imager, which employs the latest technologies to enhance radiography acquisition and diagnostics. Via laser-guide multi-motor kinematics, Hyperion positions itself around patients, reads subjects and scans accordingly, Morphology Recognition Technology (MRT) automatically identifies patient size and all parameters required to ensure correct X-Ray exposure.

No need to program exposure times, KV or mA technical factors.

15 different diagnostic programs are available to satisfy any possible diagnostic need.

HYPERION X9 3D 3 in 1 Ready Panoramic Images System (MyRay)

hyperion_{x9} 3D when you need it

Hyperion X9 is a modular concept enabling 2D PANORAMIC imaging, through CEPHALOMETRIC exams up to CONE BEAM 3D (CB3D) with true full arch volumetric scan capability.

DESIGNED IN ITALY

Hyperion X9 series is a modular concept which covers all aspects from 2D panoramic imaging, through cephalometric exams up to cone beam 3D (CBCT) with true full arch volumetric scan capability.

Hyperion is an integrated multiple platform, so even if you just take the panoramic imager today, you can upgrade as far as the 3 in 1 solution at any time in the future.

Each upgrade you may choose will have little or no impact on your operating hours. Including the full calibration procedure, an upgrade (even to 3D status) will result in no more than 2 hours downtime.

Features: The best clinical software in the business, Adaptive inter-

X-Ray Units - Belmont

PHOT-xII Dental Intra-Oral X-Ray Unit (Belmont)

Call for best deal!

PHOT-xII DC intraoral X-ray systems produce sharp radiographic images, while minimizing patient exposure to radiation. Superb periapical radiographic images, aesthetically designed appearance and ease of use makes PHOT-xII a natural choice for any dental operator.

Standard Features:

- Compact microprocessor control module with kV, mA, patient type, tooth type, cone type, film speed, exposure time and digital-ready selection switches
- Compatible with most digital radiographic systems
- Variable setting 60-70kV, 4-7mA system
- 0.7mm x 0.7mm focal spot
- 0.01-3.2 second exposure time
- 8" Cone length

With standard 31.5" Arm: 75-5/8"

30-42451

With optional 20" Arm: 64-1/8"

30-42452

With optional 12" Arm: 56-1/8"

41 YEARS EXPERIENCE

Bel-Ray II 097 Intra-Oral X-Ray Unit (Belmont)

Bel-Ray II Model 097 X-ray delivers reproducible, high quality periapical radiographs and employs simple, intuitive controls for exposure parameter settings.

Bel-Ray II intraoral X-rays are available for wall, 4 x 4 stud mount or pass-thru mount mounting

Standard Features:

- Compact microprocessor control module with patient type, tooth type, cone type, film speed and exposure time selection switches
- Control module can be installed on wall or on the central power console
- Digital-ready switch
- 70kVp
- 4-7mA (selectable)
- 0.7mm focal spot
- 0.02-3.2 second exposure time
- 8" Cone length
- 31.5" Horizontal arm (Model 097WK31)
- Wall plate for mounting on 16" centers
- ETL classified

Panoramic X-Ray Units - Belmont

BelMAX CM Digital Panoramic/Sephalometric X-Ray System

Belmax CM extraoral X-ray system is a new digital Panoramic/ Cephalometric X-ray system that is simple to use, produces sharp diagnostic quality images and includes built in tomography software.

Standard Features:

- Sharp images can be obtained, even with mild patient positioning errors.
- High frequency X-ray generator minimizes patient exposure to radiation.
- Single CCD sensor can be moved between panoramic and cephalometric docking ports.
- Pushbutton controlled three-laser beam alignment system for correct positioning.
- Pushbutton controlled X-ray head height adjustment accommodates adults or children, both seated and standing.
- Exposure parameters are easily selected on an outboard computer with a few mouse clicks.
- 60-90kV; 2-12mA
- 0.5mm x 0.5mm focal spot
- Fast 7 second scan or 12 second scan time
- Rotational speed adjusts to reduce shadow effect on the image of the cervical vertebrae
- System includes TWAIN driver to interface with most practice management systems UL listed

UL LISTED

Bel-Cypher N Digital Panoramic X-Ray Sys-

Call for available options and best deals

Simple to use and affordable, the Bel-Cypher N digital X-ray system produces outstanding Panoramic, TMJ and Bitewing images.

Standard Features:

- Digital panoramic (child, adult), 4 view lateral and Bitewing (child, adult) imaging
 - Simple to use
 - Sharp images can be obtained, even with mild positioning errors
 - Smooth X-ray head height adjustment with one-touch release
 - High-frequency X-ray generator minimizes patient exposure to radiation
 - Three-laser beam alignment system for correctly positioning patient mid-sagittal, frankfort and focal-trough planes
 - 60-80kV, 2-8mA
 - 0.5mm x 0.5mm focal spot
 - Fast 10 second scan time
 - Reliable CCD sensor technology for the aquisition of 12 bit images
- TWAIN driver included

X-Ray Units - X.Zeal

XZeal Z70 Wall Mounted X-Ray Unit

WALL MOUNTED MODEL

Built with resistant materials, the Z70 mobile unit offers a folding arm with soft movements and precision, providing an easy positioning to take radiographies

The Z70 has an electronic controller with microprocessor with pre-programmed keys that facilitate the daily operation of the equipment. The times of exhibition has a strict control to obtain a better result of the operation

- With capacity of 70 kVp and 7 mA, the X-Ray head has lead covering. It offers radiographic performance with images of excellent contrast and hi definition. The Z70 wall model is prepared to be installed in a "Single Stud" (4x4), "Double Stud" (16" – Wall plate Included) and Block wall. For Passthrough installation is required a minimum width of 14 inches. Also it is possible to adapt a Push Button and Remote Control.

XZeal Z70 Mobile X-Ray Unit

MOBILE MODEL

Built with resistant materials, the Z70 mobile unit offers an arm with soft movements and precision, providing an easy positioning to take radiographies.

Mounted on movable base and column, it allows balanced and safe displacement. The front casters have a security brakes for better use of the device.

The Z70 has an electronic controller with microprocessor with pre-programmed keys that facilitate the daily operation of the equipment. The times of exhibition has a strict control to obtain a better result of the operation.

- With capacity of 70 kVp and 7 mA, the X-Ray head has lead covering. It offers radiographic performance with images of excellent contrast and hi definition.

Portable Digital X-Ray Unit D3

It has the following features:

- Convenience of being cordless using rechargeable Li-polymer battery pack
- Benefit of having a great reduction of X ray exposure to the patient and dentist i-e, about 1/7 radiation of the conventional X ray machines
- Has a high frequency circuit of inverter type incorporated in it
- Has a most suitable and diverse sensor system
- Very easy to use with a comfortable handle for holding it

Full unit plus 1. Shield, Two batteries, Charger, Bag, Manual CD, Software	30-97161	3,695.00
Manufacturer extended warranty	30-97162	500.00

Portable Digital All In One X-Ray Systems D4

Cordless Portable Digital All In One X-Ray Systems D4 helping out your professional skills in dentistry. It is now ready to replace the previous versions of mounted X-Ray machines.

Portable X-ray D4 provides you with

- Convenience of being cordless
- Charging battery pack of loading/unloading type
- Minimum chances of radiation exposure as it emits 1/7th radiations as compared to previous systems
- More compact in size and shape
- has inverter type high frequency circuit incorporated in it
- Applicable to both digital and film type sensor

Phosphor Plate Scanner - Apixia

Apixia Phosphor Plate Scanner

Digital Phosphor Plates Scanner

INSTANT & INTELLIGENT

LASER FAST IMAGE PROCESSING

FLEXIBLE IN MORE WAYS THAN ONE

POWERFUL SOFTWARE INCLUDED

Imaging is fast and simple. The smart top-loading design harnesses the power of gravity for simple loading and fuss-free use. In less than ten seconds, the crystal clear radiograph appears on the computer screen, ready for viewing. Simply insert the next exposed plate when ready.

Phosphor plates have all the benefits of traditional X-ray film with the immediacy and environmental benefits of digital radiography. There is no more need for hazardous and costly film processing chemicals with the DIGIREX PSP Scanner.

Patient comfort is also assured with thin flexible plates in multiple sizes. After a quick scan of plates, high resolution images are ready to be stored, emailed, and printed at the touch of a button.

Plates can be used over and over saving time and money on costly traditional film. Digital imaging is finally within the reach of any dental office's financial and technical abilities

- **Saves: Time, Money, Space & Environment**
- **Compact Tabletop Design**
- High Resolution Scans in a Fraction of the Time
- Automatic In-line Eraser
- Powerful, Easy-To-Use Software Included
- Value-Priced for any Dental Practice
- Dimensions 258 mm x 138 mm x 183 mm, Weight 3.6 kg
- **Scan Time 10 seconds**
- Connection Type USB 2.0
- Plate Sizes Takes from size 0 to size 3

Optional integration to all leading brands of practice management software: EasyDent, EagleSoft Practiceworks, Softdent, Dentrax, EZ2000

Apixia PSP Scanner + 12 Plates size #2 + Imaging Software + 500 Barriers envelopes

Film Processor SRX101A Tabletop (Konica Minolta)

The **SRX101A** tabletop processor offers variable speeds which can be set from within the processor. This allows you to choose the optimum cycle speed to match your processing needs (90 Sec, 120 Sec, 180 Sec). Konica Minolta's 90 second cycle allows fast developing of all super rapid processable films.

- A compact design that saves space
- An automatic standby with jog cycle for conserving water and energy.
- State-of-the-art technology stabilizes developer and dryer temperatures. It also offers automatic replenishment.
- A 17-inch wide film transport system provides faster film feed for larger radiographs, or two 8"x10" films (or smaller) can be processed side-by-side. Up to 75 10"x12" or 60 14"x17" films can be processed per hour at the 90 second processing cycle.

CU2 Digital Video USB intra oral camera (MyRay)

Digital USB 2.0 Camera with Progressive Scan Technology

The MyRay C-U2 Intraoral Camera generates clear, explicit images and features the highest degree of illumination.

The digital video system is fully integrated into the handpiece, and progressive scanning allows perfect image-freeze and guarantees top-quality definition.

The viewing angle is partially inclined away from the extremity of the handpiece for easy access to distal and rear tooth areas.

The C-U2's 12 micro-light provide the highest degree of illumination in its category.
Communication made simple: Efficient communication thanks to sharp images. Encourage patients to undergo treatment by involving them at each step of the plan. Visual communication is a simple and hands-on experience. C-U2 brings this type of communication to life: straightforward and simple to use, totally automatic without the need for any manual adjustments, it generates clear and explicit images. Technologically advanced beneath the surface, it is easy and intuitive to use.

C-U2 is the communication tool designed for professionals who have chosen to increase their efficiency through the use of a computer in the operating area, right beside where they work. The use of a computer makes acquisition and filing of dental images a simple task, organising them in nominal clinical folders, and ensures long-term rapid access for consultation purposes.

C-U2, digital by nature.

12 micro-lights: The highest degree of illumination in its category, enabling an efficient spread of light examining the oral cavity, thus producing bright images w/sharp defined colors, Automatic brightness setting, Progressive scan, Communication made simple, Focus Free, Touch Sensitive Control, Retro Flex Vision, Easy to use and Quick connect

Camrex 191A Intraoral Camera (Dentamerica)

Intraoral Camera with Multiple Image Memory

The CAMREX handpiece is small and lightweight, weighing in at only 89 grams. It contains 4 white LED lamps for illumination to provide maximum color reproduction. The CAMREX has a 4 freeze frame memory stored in its video process unit. Single images can be viewed full screen or 4 images can be viewed simultaneously in a split screen format. The toggle switch is conveniently located on the handpiece so that the user can rotate through the captured images with ease. A built-in lens protector is designed to prevent dust and scratches to the optical components. Also included are disposable sleeves designed to fit snugly on the handpiece to prevent patient cross-contamination.

The Camrex is truly universal, being offered in the NTSC and PAL video formats as well as coming with a universal AC power source (AC 100V~240V). Live images are captured by using either the handpiece freeze button or the included foot pedal. The foot pedal has a special circular design so that it can be comfortably activated from all 360°. The CAMREX 191A is incredibly easy to setup. Just four connections are needed: the AC power supply, the CAMREX handpiece, the foot pedal, and the television video cable. You will be up and running in no time with the simplicity of the CAMREX 191A.

Curing Light Units - Bonart/ First Medica

Prestige Dental Products, Inc.
Tel: 877-772-3888

ART-L3 Pro LED Cordless Curing Light (Bonart)

- Built in Li-on battery with estimated charging time of 2 hours and capacity of approximately 180 ten second cures.
- Its LED head designed like a high speed hand piece angle for better reach and durability. It has the optical wave-length of 430-470nm, with flux intensity of 1,000 W/cm².
- Timer setting and 3 varieties of modes : Fast, Ramp and Pulse.
- Stand up battery charging cradle (as pictured) is included.

Blue Color 25-90071 **224.95**

ART-L3 LED Cordless Curing Light (Bonart)

3 WATTS CORDLESS CURING LIGHT SYSTEM

At long last, introducing the latest innovative dental technology from Bonart, the portable and light weight ART-L3(PS) pen type cordless LED curing light. Great quality, economical, and compact. Built to outlast its competitors.

Blue Color 25-11112 **224.95**

ART-L5 LED Cordless Curing Light (Bonart)

System includes following accessories:

- Light Guide Fiber and Protector
- Rechargeable Base
- AC Power Adapter Cord
- User Manual

Blast-Lite LED Cordless Curing Light (First Medica)

Great curing light.

High power, > 1,600mw/cm²
Five Second or less deep cure
Removable glass tip, does not require sleeve that can obstruct work area, can be sterilized
Programmable audible beep
Timer setting of 5,10 and 20 seconds
Long lasting Lithium-Ion battery, over 750 5-second cures
Metal case allows for easy cleaning
Assembled in USA
2 years warranty

Unit 25-11116 **589.95**

LED Blast Halogen Curing Light Unit (First Medica)

High Power > 1,100mw/cm², > 1,500mw/cm² with optional Turbo Accelerator tip
NiMh battery has long battery life
No limitations on cycles – does not shut down after a few cycles
Removable glass tip, fits all Hilux™ and Demetron™ units
Robust design for hard day in day out use

LED Blast Unit with Standard tip 25-11143 **658.95**

LED Blast Plus Unit
includes Standard & Turbo tip 25-11142 **749.95**

Hilux 250 Curing Light (First Medica)

- Best value for the money
- Comes with 11mm tip
- Accepts all Hilux™ and Demetron™ light guides
- Output about 600mw/cm²
- 1 year warranty

Curing Light Units— Dentazon/Dentamerica

Prestige Dental Products, Inc.
Tel: 877-772-3888

Cybird XD Cordless LED Curing Light (Dentazon)

- 2700 mW/cm² Light intensity.
- 1.5 Seconds to cure composite
- 2 Exceptionally powerful curing modes for rapid curing of light-cured materials
- Constructed with robust industrial grade aluminum for light-weight, excellent durability and heat dissipation
- Built-in advanced protection module prevents the device from overheating and guarantees safe and flawless performance
- 2 year warranty

Unit 25-98801 **639.95**

Litex 696 Turbo Cordless LED Curing Light (Dentamerica)

- Ultra high intensity over 2000 mW/cm²
- Cure composite 4mm thick in just 3 Seconds
- 360 Degree rotatable light guide for easy access
- Large lithium battery capacity provides hundreds of curing cycles
- Low battery warning beeper

- Built-in light intensity indicator

Unit 25-16301 **549.95**

Litex 695 LED Pen Type Dual Intensity Curing Light (Dentamerica)

Thin & lightweight dual intensity polymerization LED curing light. LED life 100,000 hours. Automatic timer with audible tone and digital display on handpiece. Light intensity of 1,200 mW/cm² cures composites in seconds. 1 year warranty

Unit 25-11167 **369.95**

Litex 682 Halogen Dual Intensity Curing Light (Dentamerica)

- Two-phase polymerization curing
- User programmable intensity and time settings conveniently located on the handpiece for fingertip control
- Built-in intensity meter
- Light weight, aseptic and ergonomic handpiece design

- Digital countdown timer with audible beeper at every 10 seconds, onset and completion of both phrases of curing cycles
- 75 watts, 12 volts halogen lamp
- Interrupt cycle capability
- Autoclavable fiber optic probe, full 360 degree rotation
- Standard package includes 9mm general purpose probe and eye protection for safety operation. Optional light guides (3mm and 13mm available)

Unit 25-11163 **369.95**

Litex 696 Cordless LED Dual Intensity Curing Light (Dentamerica)

- Delivers 1200 mW/cm² of power—cures to a depth of 4mm in under 10 seconds.
- Large lithium battery capacity provides 750 10-second cycles when fully charged.
- Recharges to full power in six hours.
- 10-minute auto

power-off battery saver.

- Smooth, contoured ergonomic design offers maximum comfort and control—weighs only 5.9 oz.!
- One-touch start/cycle-interrupt button.
- Autoclavable 8.5mm fiberoptic glass tip rotates 360° for full arch access.
- Built-in light intensity monitor.
- Low-battery warning beeper.

Cordless Curing Light System LED 55N (TPC)

- Battery: Lithium Ion, DC 3.6-4.2V
- Power adapter: 90-250V AC, 50-60 Hz
- Charging base: 9V DC
- Power consumption: 5 W LED
- Wavelength range: 430-490 nm
- Light Intensity: 1,250 mW / cm²
- Dimensions: 7"L x 1"W x 1"H
- Weight: 160 g

LED 55N Unit 25-17021 **349.95**

Coltolux LED (Coltene Whaledent)

High Power LED Curing Light - Slim, Powerful, Cordless

Coltolux®LED combines a slim curing probe with high output in a cordless lightweight pen-style design. Its heat sink technology reduces the amount of heat emission and eliminates the need for a fan.

Ideal for hard to reach posterior areas.

Audible signal every 10 seconds and automatic power saving sleep mode after 60 seconds of operation.

Hundreds of cures with a fully charged battery.

Coltolux LED Curing Light Unit 25-26111 **419.95**

SPEC 3 LED Curing Light (Coltene/Whaledent)

Chair time can be effectively reduced due to rapid and deep polymerization on various light cured materials. The sealed construction of the S.P.E.C. 3's aluminum body ensures quick and easy disinfection between patients. The powerful Lithium Polymer Battery offers to perform over 300 ten second cures between charges. S.P.E.C. 3 features multiple curing modes (3K, Standard, Ortho) for maximum functionality in any clinical situation.

MK Series Manual Kwiklav (Tuttnauer)

1 YEAR WARRANTY

23 LITER

The Tuttnauer 2540MK Series is also available in a quick cycle model, the Kwiklave (MK). This sterilizer offers all the proven, dependable features of our manual autoclave, with the added benefit of reducing the total heat up time. This autoclave is the perfect choice for quick instrument turn-around or a high volume office. Speed and reliability are accomplished without sacrificing load size. 1 year parts and labor warranty. Model 2540MK requires a voltage between 220V and 235V for proper operation.

Features:

- Automatic shut off at the end of both the sterilization and dry cycles
- A long life electro polished chamber and door
- Double safety locking device prevents door from opening while chamber is pressurized
- Drain valve is located on the front, allowing for quick and easy draining of water reservoir
- Dual safety thermostat to protect against overheating

EZ Series Automatic Autoclave/Sterilizer (Tuttnauer)

Fully Automatic Autoclaves EZ9 & EZ10

With the simplicity of one touch design, all your sterilization and drying needs are fulfilled. The Tuttnauer fully automatic autoclaves fill, sterilize, exhaust and dry at the touch of a button. FORGET IT ONCE YOU SET IT.

Features:

- Closed door active drying system to maintain sterility and ensure efficient drying of packs and pouches
- High efficiency air pump circulates hot air after the sterilization cycle for fast drying
- Hepa filter 0.2µm air filter (replaceable)
- Pre-programmed cycles for: unwrapped instruments; wrapped/packs; glassware and additional drying cycle
- All program parameters can be customized and stored
- Automatic shut off at the end of both the sterilization and dry cycles
- Audible and visual cycle interruption alert
- Double safety locking device prevents door from opening while chamber is pressurized
- Low water sensor prevents activation of sterilization cycle when there is insufficient water in the chamber or reservoir.
- Constant monitoring of temperature and pressure for sterilization
- Power outage recovery system
- Door design prevents steam from coming in contact with control panel
- Optional internal printer documents: date, time, temperature and pressure
- 510k clearance for dental hand pieces
- Drain valve is located on the front, allowing for quick and easy draining of water reservoir
- International certifications

Fully Automatic Kwiklave™ EZ 10K

The Tuttnauer EZ series is also available in a quick cycle model, the Kwiklave (EZ10k). This sterilizer offers all the proven, dependable features of our fully automatic autoclaves, with the added benefit of reducing the total heat up time. This autoclave is the perfect choice for quick instrument turnaround or a high volume office. Speed and reliability are accomplished without sacrificing load size. 2 year parts and labor warranty. Model EZ10k requires a voltage between 220V and 235V for proper operation.

When applicable a buck/boost transformer (0.5KVA) may be required.

Elara 11 Class B Automatic Autoclave Sterilizer (Tuttnauer)

The Elara 11 Sterilizer is designed for sterilization of wrapped, porous and hollow loads. The chamber volume is large, external dimensions are small, making it especially suitable for smaller clinics requiring a high turnover. The control system is smart and intuitive, easy to use and has a large memory for consistent and reliable performance.

Efficient:

- Short cycle and high volume pre and post vacuum pump for perfect class B sterilization results
- 316L grade stainless steel chamber and door with electro-polish finish
- A built-in steam generator provides steam and facilitates a standby steam mode
- The door closes smoothly and locks automatically

Features:

- Large 7.5 Gallon chamber within a small foot print. A perfect fit for standard 24 inch shelves or counters
- 5 stainless steel trays and can also hold cassettes
- Water filling from the front economizes on office space by eliminating the need to keep the top of the autoclave accessible

Safety Features:

- Cycle will not start unless the door is properly locked
- Automated double locking safety device prevents the door from opening while the chamber is pressurized
- An automatic safety shut-off prevents overheating of the chamber
- The autoclave comes with safety pressure-release valves for the chamber and generator

Elara 11 Class B 30-11190 **Call for Price**

Low maintenance - No supplies needed

- You can adjust the time to: 6 Minutes cycle time for unwrapped Instrument, or 8 Minutes cycle time for Hand pieces, or 12 Minutes cycle time for wrapped Instrument
- Contaminated Implants or those needing alterations can be re-sterilized fast
- Avoids added risk and time of making new appointment and re-sedating patient if alteration is needed
- Quick cycle times which reduce needs for increased instrument inventory
- Excludes corrosion, rust and dulling associated with steam sterilizers
- No foul odors, chemical residues or possible health hazards attributed to chemical sterilizers
- Scheduling of your patients at your convenience instead of waiting for sterilization of long cycle sterilizers

Unit, 110V	30-92381	3995.95
Unit, 220V	30-92382	4095.95
