Endo Units

Therma-Flo Composite Applicator (Vista)

Therma-Flo™ Composite Applicator is revolutionizing composite delivery!

Fill bulk restorations in seconds - multiple levels for improved composite handling properties and increased ability to use highly filled composites.

Features:

- Automated delivery of composite material
- Warms up to four compules for multiple restorations or layering
- Adjustable heating levels for improved composite handling properties
- Allows increased ability to use highly filled composites
- Tip maintains heat level for optimal temperature at point of delivery
- Cordless, compact, lightweight – ergonomic design reduces hand fatigue
- Compatible with most standard compules

Full Unit: 20 of 2x Step-Down tips, 20 of 4x Step-down tips, Rechargeable handpiece & warming base with 3 nose cones

29-26201 1149.95

Step Down tips 2x, 40 Cup/Pkg

29-26202 29.95

Step Down tips 4x, 40 Cup/Pkg

29-26203 29.95

Therma-Flo Composite Warming Kit (Vista)

For precision placement of highly filled composites...

Therma-Flo™ is a warming kit engineered for optimal composite performance.

Evidence shows that when highly filled composites are heated, they perform with the same clinical ease of flowables!

Vista's new Therma-Flo™ Composite Warming Kit offers you an easy way to increase the flowable viscosity of composite material without compromising tensile strength, wear-resistance or aesthetics.

Benefits of HEAT:

- Increased flowability = Easy extrusion
- Improved polymerization= Reduced voids
- Reduced curing time
- Greater wear resistance

Composite Warming Kit Features:

- Heats composite up to 155° F
- Warms multiple compules – dome accommodates multiple syringes
- Compatible with most standard compules and composite syringes
- Includes *patent pending* Step Down tips – for precise placement of composite material

110V Kit: (1) Warmer unit (2) Composite syringes (20) 4X Step Down tips (20) 2X Step Down tips

29-26221 495.95

220V Kit: (1) Warmer unit (2) Composite syringes (20) 4X Step Down tips (20) 2X Step Down tips

Step Down tips 2x, 40 Cup/Pkg

29-26211-1 29.95

Step Down tips 4x, 40 Cup/Pkg

29-26212-1 29.95

Vibringe Sonic Irrigation System (Vibringe)

The Vibringe is the first endodontic sonic irrigation system that enables activation of the irrigation solution, acoustic streaming, in the root canal, in only one step.

The activation of the disinfectant enriches and completes your irrigation procedure and improves the success rate of your endodontic treatments, without any hassle!

Prestige Dental Products, Inc.
Prestigedentalproducts.com
Tel: 877-772-3888

Vibringe® is developed to make the dental practioners life easier. That is why we design easy-to-use products. At Vi-bringe B.V. we believe that we should not interrupt into your actual processes and routines too much. Therefore the Vi-bringe® embraces your actual irrigation procedure, but will improve your success rate by using the patented sonic flow technology which causes acoustic streaming in the root canal.

Superclean: Vibringe® has been clinically proven to realize a more thorough debridement and disruption of the smear layer than conventional hand irrigation. The patented sonic flow technology will realize a full irrigation to the apex and eliminates blockage. The Vibringe® is enabling the solution to reach and disinfect all portions of the canal. One can think of the lateral canals, fins, webs and anastomoses. When using ultrasonic irrigation, the Vibringe® is a perfect complementary device instead of the normal syringe to realize an even higher predictable outcome.

Vibringe® has clinically proven that it removes organic and inorganic debris from hard-to-reach areas **faster** than the conventional syringe.

Vibringe® is shown to be **completely safe** for all endodontic irrigation procedures and is compatible with all irrigation solutions like for example sodium hypochlorite and EDTA.

Vibringe® designed and developed this product in close cooperation with **general practioners and endodontists**. During this extensive research and development stage finally 8 out of 10 **dentists love to work with Vibringe®**. Main reasons for that? It is an easy-to-use device which embraces conventional irrigation techniques and realizes a higher predictable outcome in shorter time!

I-Root Digital Apex Locator (Meta Biomed)

5th generation Apex Locator by dual frequency type.

Best accuracy in any root canal condition (Dry, Bleeding, Wet, Saline, EDTA, NaOCl or Chlorhexidine etc...) Can measure the apical constriction exactly without mis-measurement. Developed & upgraded based on the technology of e-Magic Finder (EMF-100 Series) Apex Locator.

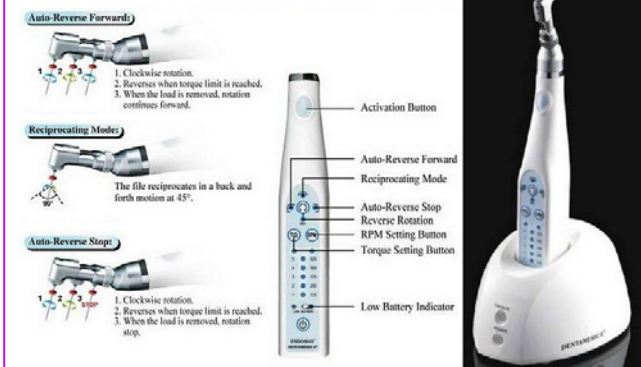

Measurement by eye and ear at the same time: Available for checking the apex by digital No., graph and beep sound. When the file is closer to the apex, indication sound is intermittent beep sound. When reaches to the apex It provides continuous beep sound and red Apex indication for user's convenient and saving time, it helps to find apex easily and quickly.

Color Display: From graph 2.0 to 1.0, Indicates graph by blue color. From graph 0.9 to 0.5, Indicates graph by green color. From graph 0.4 to -0.5, Indicates graph by red color. From the 0.5mm to -0.5mm. The tooth graphic and Apex indication will be blink with color display.

Gutta Percha Cutter and Trimmer

In 3 seconds only

This instrument is developed for the easy and safe removal and trimming of excess gutta-percha and thermal dense filling in your endodontic cases. It is composed of endo-remover and trimmer operated by two AAA, NiMH rechargeable batteries, which are included in the package.

ERGONOMIC DESIGN

SLIM: To feel comfortable for the treatment in the mouth like dental handpieces

LIGHTWEIGHT: It weighs only 50g together with 2 cells which leads to easiness in your treatment

PRODUCTIVE ENVIRONMENTS

There is no need for alcohol lamp or burner to heat some instrument to remove the excess, also no need for an assistant.

ECONOMICAL:

If NI-HM batteries are used, you can use this instrument in very powerful and economical ways than disposable alkaline batteries. Normally, it has about 400-500 charging cycles which leads to long lasting usages, also if fully charged, normal usage is between 15-20 times

SAFETY & DURABILITY

This instrument might be semi-permanent only if batteries and tip are refilled, also the patient can not notice the treatment because they can not see compared to the usage of conventional alcohol lamp usage. The patients feel comfortable.

Prior to using this instrument, please charge and check the batteries.

1. Push the button only when are ready to operate
2. Place the edge of the tip to the canal orifice, and then push the button for 3 or 4 seconds. It produces enough heat to cut the excess within seconds. That means you don't need to hold the button for overlong time.
3. After removing the excess, please pull the instrument carefully not to touch the skin of the patient.
4. After it comes cool, please clean the tip with wet alcohol gauze or sterilize for the next usage.

Cutter & Trimmer Unit: with 4 X AAA rechargeable Ni-MH batteries, Rapid charger and two cutting and trimmer tips

Mark VII Apex Locator (Miltex)

The Mark VII Apex Locator gives dental professionals an exact measurement of the canal length under all conditions, including dry, wet and bleeding. This makes working in the canal easier and more accurate. It precisely measures the distance from the tip of the endodontic file to the foramen. The Mark VII allows dental professionals to know the depth of the canal by showing when they are 2.0 mm, 1.5 mm, 1.0 mm, 0.5 mm, 0.25 mm away from, and then the apex has been reached.

The Mark VII Apex Locator is easy to use and designed to be placed near the oral cavity, in the operator's field of vision. The apex locator is often clipped to the patient's napkin to ensure that the unit does not accidentally fall. The Mark VII does not require calibration between measuring multiple canals, thereby immediately enabling accurate measurement of another canal.

Features:

- Can be used in any canal condition
- Provides Accurate Readings
- Compact Size, Easy to Use
- Does not require calibration at the start of a procedure or between canals

Benefits:

- Saves time and canal does not require certain condition
- Allows dental professional to know where they are in the canal in relation to the apex
- Can be placed near the oral cavity, in the operator's field of vision
- Does not require any counter space
- Reduces procedural and set up time
- Reduces tray set up time and time it takes to measure multiple canals

Mark VII Unit 29-11982 **669.95**

Tri Auto ZX Cordless Endodontic Handpiece (J-Morita)

The cordless Tri Auto ZX is the only endodontic handpiece with a built-in apex locator, providing the capability and convenience to electronically monitor the root canal before, during and after instrumentation. With the combined technology and accuracy of the Root ZX apex locator, the Tri Auto ZX can significantly increase accuracy and safety.

The Tri Auto ZX also offers greater control and flexibility with the adjustable torque settings

The choice of automatic or manual mode operations provide versatility.

Root ZX II Apex Locator (J-Morita)

Apex Locator with Low Speed Handpiece

As the world's best selling apex locator, Root ZX II has set the industry standard for accuracy and patient safety.

Invented in 1992, it was the first unit with the ability to work in wet canals - measurement is not affected by the presence or absence of blood, other discharges, or electrolytes. Root ZX® II features patented technology which offers an accuracy rate of 97.5%*. User friendly, its display screen is large and easy to read. The action of the meter in the display corresponds exactly to the tactile sensation of using the file. Other features include: slim, lightweight file holder, no zero-adjustment, automatic calibration, battery power indication, and automatic power off function.

As an optional upgrade, a module enables the unit to function as a low speed handpiece, apex locator, or a combination of both. The module snaps easily onto the back of the unit and offers numerous safety features including Auto Apical Reverse and Auto Apical Slow Down.

APEX LOCATOR FEATURES

- 97.5% accuracy rate*
- Automatic calibration
- Ability to work in wet canals
- Easy to read display screen
- Upgrade option to Low Speed Handpiece

Endodontics

Long File Holder

A long touch file holder is available to be used with the probe cord. It features a fork-like tip that allows the clinician to get an apex reading by simply touching the file. The file holder is 5 inches long, autoclave safe and ideal for hard-to-reach molar procedures, thus increasing access to the work area.

Indications

Apex location/measurement of root canal length

RootPro Endo Motor-Apex Locator (Pac-Dent)

CANAL PREPARATION & APEX LOCATOR SYTEM

RootPro™ Wireless is the most advanced apex locator / endo motor all-in-one system of its kind. With a newly added wireless foot pedal, the RootPro dramatically reduces the clutter and improves your efficiency

The RootPro™ endodontic motor with Low-Speed Handpiece is a dual-function device that prepares root canals while displaying accurate measurements of the root canal. The RootPro™ offers many automatic safety control options, making it the ideal choice for Dentist or Endodontist. It provides the user with expected predictability in today's dental practice. RootPro™ also accurately and precisely locates the position of the file inside a root canal without requiring the user

Endodontics

to set the machine to zero. RootPro™'s unique automatic calibration function ensures accuracy and eliminates the effect of changes in temperature, moisture, etc. inside the canal even during treatment. It comes with a wireless foot switch, dramatically reducing clutter and drag during operation, ensuring a user-friendly experience throughout.

ADVANTAGES

- Prepares root canals while displaying accurate & precise measurements of the root canal
- Offers many automatic safety control options: Auto Motor Start/Stop, Auto Torque Reverse, Auto Apical Reverse
- Accurately and precisely locates the position of the file inside a root canal
- No zero-adjustments needed
- Automatic calibration ensures accuracy & eliminates the effect of changes in temperature and moisture
- Wireless foot switch for a user-friendly & clutter-free operation

1x Complete RootPro Unit: 1 x Root-Pro main unit with low-speed handpiece, 1 x probe cord, 3 x file holders, 1 x handpiece rest, 1 x foot switch, 1 x ac adapter, 5 x contrary electrodes, 1 x canal-length tester, 1 x AR oil

Hyflex CM NiTi Rotary Files 19mm (Coltene)

CONTROLLED MEMORY EFFECT:

HYFLEX CM NiTi Files have been manufactured utilizing a unique process that controls the material's memory, making the files extremely flexible, with no re-bound. This enhancement in NiTi file production technology gives the file the ability to more closely follow the anatomy of the canal, reducing the risk of the file separation, binding and complications such as ledging, transportation, and perforation.

FATIGUE RESISTANT-LESS BREAKAGE: HYFLEX® CM Niti Files with Controlled memory Effect are up to 385% more resistant to cyclical fatigue compared to other Niti files, reducing the incidence of file separation.

EASY TO FOLLOW, SAFE FILE SEQUENCE: HYFLEX CM Niti Files come with a recommended sequence of 3-6 files depending on the size of the root canal, making the procedure straightforward and easy to follow.

08/25, 19mm, 6/Pkg 29-11713 **53.95**

Hyflex CM NiTi Rotary Files 21mm (Coltene)

CONTROLLED MEMORY EFFECT:

HYFLEX CM NiTi Files have been manufactured utilizing a unique process that controls the material's memory, making the files extremely flexible, with no re-bound. This enhancement in NiTi file production technology gives the file the ability to more closely follow the anatomy of the canal, reducing the risk of the file separation, binding and complications such as ledging, transportation, and perforation.

FATIGUE RESISTANT-LESS BREAKAGE: HYFLEX® CM Niti Files with Controlled memory Effect are up to 385% more resistant to cyclical fatigue compared to other Niti files, reducing the incidence of file separation

EASY TO FOLLOW, SAFE FILE SEQUENCE: HYFLEX CM Niti Files come with a recommended sequence of 3-6 files depending on the size of the root canal, making the procedure straightforward and easy to follow.

Hyflex CM NiTi Rotary Files 25mm (Coltene)

300% more resistance to separation
 HyFlex® CM™ NiTi files with Controlled Memory are up to 300% more resistant to cyclical fatigue compared to other NiTi files* which substantially helps reducing the incidence of file separation. No rebound + Extreme flexibility = Superior Canal Tracking

HyFlex® Controlled Memory NiTi files have been manufactured utilizing a unique process that controls the material's memory, making the files extremely flexible but without the shape memory of other NiTi files. This gives the file the ability to follow the anatomy of the canal very closely, reducing the risk of ledging, transportation or perforation. Regains shape after sterilization = Multi-use The shape and strength of files with straightened spirals can be restored during autoclaving and reused. Files not returning to original shape should be discarded.

Liberator Nickel Titanium Rotary Files (Miltex)

The liberator™ rotary nickel-titanium endodontic files

are the result of years of research and development as well as feedback from leading clinicians in the field of endodontics. The files incorporate a unique straight flute design and manufacturing process that eliminates the traditional helical flutes found on virtually all rotary endodontic files.

Feel the safety and control - The patented design of the non-cutting Roane tip minimizes ledging and transportation while helping to keep liberator files centered in the canal.

Liberator files are designed with straight flutes that will not self-thread, unlike helically fluted files. As proof, a controlled study measure the incidence of self-threading of the Liberator compared to competitive rotary files as shown here.

Feel the superior cutting efficiency - The triangular cross section and lack of radial lands provide sharp cutting edges and reduce torque demand on Liberator files. Because the files operate at high RPM (1,500-200) compared to conventional files (300-500), torque is further reduced according to this basic rule of physics.

Efficient debris removal - A vortex created by the high rotational speed effectively removes debris.

Faster, Easy-Use - Liberator files rotating at 1,500-2000RPM cut dentin faster than conventional rotary files at 300RPM. This higher speed also provides excellent tactile feel in canals. Plus, torque control is not required for electric motors. And even air-driven handpieces may be used at 1,500 to 2,000 RPM.

Versa Brush (Vista)

Versa Brush™ is a rotational utility brush which is ideal for a variety of endodontic and restorative procedures

Incredibly versatile, strong and bendable, **Versa Brush™ is a "must have"** for both endodontists and restorative dentists. It is the ideal tool for cleaning endodontic access cavities and removing contaminants left behind, such as sealer components and smear layer.

Used in a latch-grip handpiece at 250rpm or less, the prepared space can be literally scrubbed clean, allowing for more reliable and predictable bonding.

Versa Brush™ is perfect for:

- Cement removal
- Post hole cleaning
- Cleaning coronal access openings
- Use with EDTA to enhance cleansing and removal of smear layer

Gutta Percha Point

Gutta Percha Cutter and Trimmer

In 3 seconds only

This instrument is developed for the easy and safe removal and trimming of excess gutta-percha and thermal dense filling in your endodontic cases. It is composed of endo-remover and trimmer operated by two AAA, NiMH rechargeable batteries, which are included in the package.

ERGONOMIC DESIGN

SLIM: To feel comfortable for the treatment in the mouth like dental handpieces

LIGHTWEIGHT: It weighs only 50g together with 2 cells which leads to easiness in your treatment

PRODUCTIVE ENVIRONMENTS

There is no need for alcohol lamp or burner to heat some instrument to remove the excess, also no need for an assistant.

ECONOMICAL:

If Ni-HM batteries are used, you can use this instrument in very powerful and economical ways than disposable alkaline batteries. Normally, it has about 400-500 charging cycles which leads to long lasting usages, also if fully charged, normal usage is between 15-20 times

SAFETY & DURABILITY

This instrument might be semi-permanent only if batteries and tip are refilled, also the patient can not notice the treatment because they can not see compared to the usage of conventional alcohol lamp usage. The patients feel comfortable.

Prior to using this instrument, please charge and check the batteries.

1. Push the button only when are ready to operate
2. Place the edge of the tip to the canal orifice, and then push the button for 3 or 4 seconds. It produces enough heat to cut the excess within seconds. That means you don't need to hold the button for overlong time.
3. After removing the excess, please pull the instrument carefully not to touch the skin of the patient.
4. After it comes cool, please clean the tip with wet alcohol gauze or sterilize for the next usage.

Cutter & Trimmer Unit: with 4 X

AAA rechargeable Ni-MH batteries, Rapid charger and two cutting and trimmer tips 29-11539 **139.95**

Gutta Percha Cutter and Trimmer (MTI)

- Hot cutting of gutta percha prevents the GP points from moving and loosening unintentionally
- Designed for precise cutting of gutta percha
- This cordless handpiece and the interchangeable loop tips provide safe and easy access precisely at the canal orifice
- The instrument is introduced cold and with a touch of a button the tip heats instantly and trims off the excess gutta percha material.

Includes: handpiece, charger, set of 4 tips (assorted)

Root Canal Sealers Repairs

Acroseal Root Canal Sealer (Septodont)

This endodontic sealer seals the canal permanently, eliminating the worries about leakage and minimizing the risks of root canal treatment failures

- Adheres to the canal walls and gutta percha points
- Zero solubility in water for leak-free obturation for reduced risk of late failure
- Low viscosity allows it to flow into accessory canals for superior fill every time
- Highly compatible - can be used with all gutta-percha obturation techniques, cold or warm
- Eugenol-free - fully compatible with most cements and core materials
- Automix syringe dispensing systems delivers a homogeneous mix without the mess
- Radiopaque

Kit: 1 x 8.5g tube of base paste, 1 x 9.5g tube of catalyst paste, 1 crossed-ruled mixing pad

29-94111 **37.95**

AH Plus (Dentsply)

Root Canal Sealer Paste-Paste resin system for better handling Very high radiopacity for easy detection

Standard Pkg. of 2 x 4ml

29-11162 **84.95**

Endodontics

Adseal Root Canal Sealer (Meta Biomed)

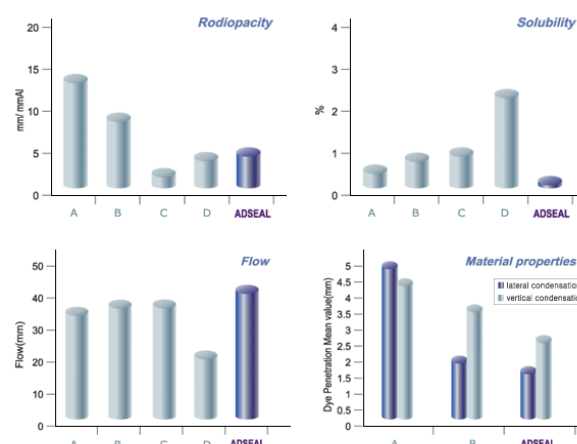

Resin-based root canal sealer (Compare to **Tubli-Seal 10.5q (KRR)**)

Advantage: Excellent biocompatibility, Easy to mix paste-paste, Hermetic sealing ability, Nonstaining to the teeth, Insoluble in tissue fluids and Good radiopacity

Components: 13.5g dual syringe (Base 9g, Epoxy resin, Calcium phosphate) Catalyst 4.5g (Amines, Bismuth subcarbonate), Spatula, Mixing Plate, Direction for use, Dimension : 80 × 200 × 43 (mm), and Weight : 135g

Physical and Chemical Properties

Working Time : 35 Minutes at 23°C (73°F)

Setting Time : 45 Minutes at 37°C (99°F)

Film Thickness : 3.3μm

Biocompatibility

Test Method		Results
Cytotoxicity (ISO 10993-5)	Agar Diffusion	
	-Freshly mixed	mild
	-Set material	none
Irritation (ISO 10993-10)	oral	no irritation
Systemic (ISO 10993-11)	acute	safe
Implantation (ISO 10993-6)		acceptable (no edema)

AH26 (Dentsply)

Resin based, non-acrylic, eugenol-free sealer Used with gutta percha:

- Densfil obturators or silver points·Radiopaque
- Working time is 4.5 hours· Set time is 12-48 hours
- Suitable for a cold & warm obturation techniques

Standard Pkg. 8gm powder & 10gm resin 29-11163 **79.95**

AH 26 Resin (Liquid Only) 10gm tube 29-11164 **49.95**

Diapex Root Canal Sealer (Diadent)

Pre-mixed calcium hydroxide and iodoform (in a silicone oil base) paste for temporary or permanent root canal treatment. Diapex is highly radiopaque and antibacterial.

2.0g Paste & 20 Tips 29-94131 **39.95**

Tips, 20/Pkg 29-94132 **9.95**

Endomet Root Canal Sealer (Septodont)

- Easy to use
- Contains thymol iodide, an antiseptic agent
- Radiopaque and non-resorbable within the canal
- Stays soft on the mixing pad but rapidly hardens when placed into the tooth canal

Kit: 12gm tube base, 1-12gm tube catalyst, 1 mixing pad 29-94091 **62.95**

Metapex (Meta Biomed)

Calcium Hydroxide with Iodoform

Temporary Root Canal Filling Material with Excellent Radiopacity (Compare with Diapex from Diadent 2.0g paste)

- Weeping canal
- Formation of a hard tissue barrier(Apexification)
- Root canal filling for deciduous teeth
- Internal & external root resorption
- Excellent antibacterial effect and radiopacity
- Premixed paste
- Premixed paste
- Disposable tips for prevention of cross-contamination

Metapex, 2.2g 29-11986 **29.99**

Root Canal Sealer Silver-Free (Prime Dent)

Excellent sealing capacity

Complete Pkg: 8gm Powder & 10gm resin 29-94101 **41.95**

RSA Roeko Seal Automix (Coltene Whaledent)

A state-of-the-art polydimethylsiloxane based root canal sealer, features the following:

- Ready for use in a 1:1 automix system
- Flows into dentine tubules and tiny crevices
- Sets in both moist and dry conditions
- Insoluble
- Expands slightly (0.2%)
- Provides mechanical retention through expansion
- Permits subsequent revision of the canal
- Does not contain Eugenol
- Radiopaque
- Extremely biocompatible
- Dispenses the sealer homogeneously mixed and free of air bubbles

Standard Set: Dual-barrel syringe, 12 flexible mixing tips, 1 cap 29-94121 **83.95**

Refill Mix Tips, 24/Pkg 29-94122 **26.95**

Sealapex Calcium Hydroxide (Kerr)

Calcium Hydroxide Polymeric Root Canal Sealer

12gm Tube Base, 12gm Tube Catalyst & Mixing Pad 29-16171 **54.95**

Tubli-Seal Endodontic Sealers & Cements (Kerr)

Tubli-Seal is a paste/paste zinc oxide eugenol root canal sealer. Tubli-Seal is light in color, non darkening, and radiopaque.

10gm Tube Base, 1-3.5gm Tube Accelerator & 1 Mixing Pad 29-12484 **39.95**

Chelating Agents

EDTA Solution Aqueous Irrigant (Vista)

- 17% EDTA in a aqueous solution with approximate ph of 8
- Ideal for root canal preparation & smear layer removal

120cc Refill Bottle 29-87681 **14.49**

3cc Unit Dose,
20 single use patient applications along with
20 Vista Probe needles, 20/Pkg 29-87682 **17.49**

30ml Bulk Syringe 29-87683 **8.95**

480ml Bottle 29-87684 **44.95**

MD-ChelCream 19% EDTA (Meta Biomed)

Easier Filing with Lubricating Action (Compare to RC Prep)

Applications:

- Root canal preparation with files and reamers
- Presence of calcifications in the canal
- Narrow canals in posterior teeth
- Smear layer removal

Advantages:

- Removal of inorganic substances by chelation (EDTA- Ca^2)
- Easier filing with lubricating action
- Produces the cleanest canal wall after smear layer removal

Cautions:

- Use MD-ChelCream with discretion to prevent perforation
- Avoid extrusion of the MD-ChelCream into the apex
- Keep the syringe capped all the time
- Store in temperature 10°C~ 25°C (50°F~ 77°F)

2 Sys. 5.4ml 29-11983 **17.99**

MD-Cleanser 17% EDTA (Meta Biomed)

Excellent Smear Layer Removal (Compare to EDTA Solution from PulpDent)

Applications:

- Presence of calcifications in the canal
- Narrow canals in posterior teeth
- Smear layer removal

Advantages:

- Removal of inorganic substances by chelation (EDTA- Ca^2)
- Easier filing with lubricating action
- Produces the cleanest canal wall after smear layer removal

Components:

- MD-Cleanser : 100Ml
- 1cc syringe
- Disposable tips
- Dimension : 50 × 115 × 55 (mm)
- Weight : 138g

100ml w/One Syringe & 3 Tips 29-11984 **9.99**

Endodontics

Prep-Rite RC (PulpDent)

- 17% viscous EDTA gel that is picked up on an endodontic file to facilitate preparation of the root canal.

Kit Contains: 4-5g Prep-Rite RC Syringes 29-87691 **23.95**

RC PREP (Premier)

For Chemo-Mechanical Preparation of Root Canals

Over 40 years of clinical

use and numerous publications demonstrate the clinical efficacy of RC-Prep for chemo-mechanical preparation of root canals.

RC-Prep's unique formulation of glycol, urea peroxide and EDTA in a special water soluble base helps remove calcifications and lubricates the canal to permit more efficient instrumentation. Whether you prefer finger or engine driven instruments, RC-Prep

Jar 18gm 29-12280 **27.95**

Jar 227gm 29-70431 **244.95**

Syringes 2 x 9 gm 29-70432 **35.95**

Syringe Kit Contains:
5-3cc Syringes & 50 Tips 29-70433 **34.95**

RC Prep MicroDose (Premier)

Direct Application Into the Canal

RC-Prep™ MicroDose® is convenient, easy to dispense and eliminates the risk of cross-contamination.

Each MicroDose pipette contains the ideal amount of RC-Prep (0.2cc) for more efficient instrumentation during root-canal procedures.

You can apply RC-Prep directly into the pulp chamber or into a dappen dish

After each use, the empty pipette is discarded and the Micro-Dose syringe can be conveniently autoclaved

Refill (Pkg. of 100) 0.2cc pipettes 29-88632 **79.95**

Well-Prep EDTA Root Canal Cleaner (Vericom)

Compare to: RC Prep (Premier)

EDTA Root Canal Cleaner

Well prep containing ethylenediamine Tetraacetic acid (EDTA) As a chelating agent allows efficient cleaning and easier preparation of the root canal.

Kit: 3 Sys x 6 gm with Tips 29-87701 **22.95**

Irrigating Solutions

Chlor-Xtra Sodium Hypochlorite (Vista)

The perfect solution for the irrigation, debridement and disinfection of root canals during and after instrumentation

- 4X Faster than ChlorCid®*
- Dissolve more tissue
- Improve Disinfection
- Reduce post-treatment complications

Chlor-XTRA™ is a 6% Sodium Hypochlorite formula; enhanced with powerful wetting agents and proprietary surface modifiers that penetrate into lateral canals and isthmuses by lowering surface tension. The result is a much more powerful oxidizing agent, 2+ times thinner than standard Sodium Hypochlorite and 2.6 times more digestive.

- 2.5 X more wetting ability**
- 2.6 X more digestive**
- Much more powerful oxidizing agent

16oz Bottle 29-87671 **49.95**

Prefilled Syringe 3cc, 10/Pkg 29-87612 **14.29**

Prefilled Syringe 12cc, 10/Pkg 29-8767123 **14.29**

Rinse-N-Dry Ethyl Alcohol Solution (Vista)

- 95% Ethyl Alcohol penetrates into lateral canals and isthmuses improving drying and disinfecting properties.
- Use after smear layer removal with EDTA to assure canal is clear of all Chlor-XTRA™ before final irrigation step with CHX-Plus™.

NOTE: CHX and Sodium Hypochlorite can not be mixed due to severe precipitate formation.

40oz Bottle 29-87711 **7.99**

Vpro CanalClean Irrigation (Vista)

CanalClean™ Irrigation Kit

- All your endo solutions in one easy kit
- Recommended to yield best outcomes

- Optimizes the time spent on irrigation
- No mess... Less time

5 Easy Steps to Improved Outcomes:

- 1 - Chlor-XTRA™ 16ml
- 2 - EDTA 6ml
- 3 - Chlor-XTRA™ 10ml
- 4 - Rinse-N-Dry™ 6ml
- 5 - CHX Plus™ 10ml

Kit: 4/Case 29-87731 **69.95**

Sodium Hypochlorite (Vista)

For the debridement and irrigation of root canals during and after instrumentation compare to **Ultradent® ChlorCid®***

Canal Clean Side-Port Irrigation Needles Tips (Dentazon)

Canal Clean irrigation needle can greatly in-

crease your patient's safety on root canal and gingival sulci irrigation treatments. Canal Clean's special design (closed-end tip & side-port opening) allows you to prevent possible root injury caused by unexpected forceful injection with conventional irrigation needle. As a result, secondary inflammation or flare-up may be also caused by polluted materials. The Canal Clean is a reliable prevention for such clinical difficulties.

Fill Station (Vista)

The simplest, most convenient way to fill your syringes: No mess, No waste, Less time

- Features syringe-activated valve and low level light indicator
- Place several units together for convenient filling of multiple solutions
- Easy to wall mount or use as tabletop modular unit

Available with HEAT for warm delivery of irrigating solutions

Heating hypochlorite solutions greatly increases tissue dissolution; the magnitude of the increase compared with RT [room temperature] varied from 30% to 300% depending on the concentration, temperature, and type of hypochlorite.

Endodontics

Therma-Flo Step Down Tips (Vista)

Extended Length for precision placement of composite materials.

Step Down tips offer a completely new delivery option for microscope enhanced dentistry and for use with high magnification loupes

Featuring a self-tapping design that will adapt to most standard compules, our patent pending Step Down tips combine the ultimate in convenience with precise placement of composite materials.

Features:

- Narrow profile for optimal visualization of work area
- Extended length for deeper access
- Narrow profile allows for optimal visualization
- Designed for easy extrusion of highly-filled composites
- Available in 2X and 4X reduction for precision placement
- Orifice reduction for greater precision during micro-restorative procedures

Developed for use with the Thermo-Flo™ Composite Warming Kit, but can be used with any standard compules or compule guns.

Step Down Tips 2x, 40Cup/Pkg 29-26211 **29.95**

Step Down Tips 4x, 40Cup/Pkg 29-26212 **29.95**

Utility Irrigating Syringes

- Disposable
- Non-sterile

12cc, 50/Box 29-98291 **11.95**

Utility Irrigating Syringes (TC Dental)

- Curved tip provides easy access for maximum canal irrigation
- Tight fit plunger and see through
- 10 cc and non sterile

Irrigating Syringe w/Curve Tips, 10cc 50Pcs/Box 29-11748 **14.99**

Vpro EndoSafe (Vista)

- Non-clogging Vpro™ EndoSafe™ is a simple negative pressure, simultaneous irrigation and evacuation device
- When used properly, it provides safe, easy and cost effective apical irrigation and evacuation.

Calcium Hydroxide Treatment

Calasept Plus Calcium Hydroxide (Wykle)

The most effective calcium hydroxide thanks to its high concentration and optimal calcium release.

CALASEPT Plus has a very high content of calcium hydroxide (> 41%) giving it a high concentration of hydroxyl ions.

These generate a high pH value of 12.4 which has a pronounced bactericidal effect.

The high concentration of calcium hydroxide in the paste provides for a long lasting release of calcium ions.

CALASEPT Plus is a ready-to-use paste in air tight syringes for direct application through the Flexi-needle. CALASEPT Plus is radio-opaque.

Kit: 4 syringes each containing 1,5 ml CALASEPT Plus & 20 CALASEPT Plus Flexi-needles, luer lock 29-26071 **58.95**

1 syringe containing: 1,5 ml CALASEPT Plus & 5 CALASEPT Plus Flexi-needles, luer lock 29-2607 **18.95**

Forendo Paste (PulpDent)

Calcium hydroxide paste with iodoform in a silicone oil base

Bactericidal - Bacteriostatic - pH > 12 - Radiopaque - Non-Setting
For temporary and intermediate root canal therapy

Forendo Paste is a strong antibacterial dressing for routine use between office visits to disinfect root canals and for complicated cases when extended calcium hydroxide therapy is indicated.

Indications:

- Disinfects canals
- Inhibits bacterial growth
- Prevents flare-ups
- Promotes periapical healing
- Treats infected root canals, abscesses and periapical lesions
- Treats traumatic injuries, root restoration, fractures and perforations
- Treats pus, hemorrhage, exudation and weeping canals
- Stimulates apexification and apexogenesis

2.2 gm syringe + 20 applicator tips 29-11523 **32.95**

Endodontics

Metapaste (Meta Biomed)

Calcium Hydroxide with Barium Sulfate Water Soluble Temporary Root Canal Filling Material (Compare to Tempcanal from Pulpdent)

Applications:

- Weeping canal
- Formation of a hard tissue barrier(Apexification)
- Temporary root canal filling
- Internal & external root restoration

Advantages:

- Easy cleaning and removing with good water solubility
- Excellent antibacterial effect and radiopacity
- Premixed paste
- Syringe type for easy delivery of the paste into the canal
- Disposable tips for prevention of cross-contamination

Metapaste (w/Barium Sulfate & Water Soluble) 2.2g Syringe with 20 Tips

29-11985 **19.99**

Pulpdent Paste (PulpDent)

The Original, Non-Setting, Pre-mixed Calcium Hydroxide Paste

For Root Canal Therapy and Vital Pulp Therapy

Bactericidal - Bacteriostatic - Radiopaque - Non-Setting

Internationally acclaimed as the world's finest treatment for:

- Vital Pulp Therapy
- Pulpal Healing
- Dentin Bridge Formation
- Root Canal Therapy

Pulpdent Paste is the original premixed calcium hydroxide methylcellulose pulpal dressing. It is indicated for direct pulp capping, pulpotomy and pulpal curettage procedures, and it is used routinely as an antimicrobial intracanal dressing between office visits to disinfect root canals and prevent flare-ups.

Pulpdent Paste promotes favorable periapical healing and is the treatment of choice in complicated cases involving infection, root restoration, traumatic injuries and other instances where calcium hydroxide therapy is indicated.

When used for vital pulp therapy, Pulpdent Paste stimulates consistent dentin bridge formation

The new dentin bridge is visible clinically after approximately 2-3 months.

Kit: 3mL syringe + 24 needles (18 gauge blunt, sterile)

29-12277 **37.95**

3 mL syringe

29-12278 **25.29**

Syringe needles, 24/Pkg

29-12279 **11.95**

TempCanal (PulpDent)

Temporary Calcium Hydroxide Root Canal Treatment

Paste **Bactericidal - Bacteriostatic - Radiopaque - Non-Setting**

TempCanal has a pH > 12 and provides the full benefits of calcium hydroxide in root canal therapy.

For routine use as an antimicrobial intracanal dressing between office visits to disinfect the canal and prevent flare-ups.

For complicated cases involving infection, traumatic injury and other instances where calcium hydroxide therapy is indicated.

Routine Treatment Between Office Visits:

- pH > 12 disinfects canal
- Prevents flare-ups
- Replaces hazardous formocresol
- Easily removed with file and irrigation

Treatment of Complicated Cases

- Promotes favorable periapical healing
- Treats infection, abscesses and periapical lesions
- Treats traumatic injuries, avulsed and luxated teeth
- Treats root resorption, root fractures and perforations
- Stimulates apexification and apexogenesis
- Treats pus, hemorrhage exudation and weeping canals

Preferred Delivery System

- Screw syringe dispensing system
- Flows through sterile 22- and 25-gauge needles directly into canal
- No mixing, no condensing
- Easily removed from canal with file and irrigation

Kit: 3mL syringe + 12 needles 29-12472 **35.99**

3 mL syringe 29-12473 **23.95**

Endo-Cushions hold (IndiGreen)

Disposable Endo-Cushions hold, arrange and clean small instruments during endodontic or implant procedures. Ideal for files, posts, screws, drills and other small items. Peel-and-stick back secures to patient napkins, tray covers or anywhere handy. Pre-arranging saves set-up time. Dense, grey polyurethane foam.

3"long 50 cushions per bag 29-87921 **18.49**

Endoring Filecaddy (Jordco)

The Endoring FileCaddy organizer provides a unique bulk storage solution for all endodontic files.

The clinician places multiple files securely into the special foam insert, closes the lid and steam autoclaves the entire FileCaddy organizer—no bag or wrap required. Single handed operation allows easy opening of the protective lid to access the processed files at chair side.

Files are easily identified, selected and transferred to the companion Jordco Endoring II organizer for the current endodontic procedure. The FileCaddy organizer disassembles easily to allow replacement of the foam insert.

Kit: 1 FileCaddy and 12 single use refill combos 29-89871 **79.95**

12 FileCaddy single use Blue Foam Refills 29-89872 **25.95**

12 FileCaddy single use Yellow Foam Refills 29-89873 **25.95**

Endoring II Organizer Gelwells (Jordco)

The Endoring II organizer enables the clinician to directly place, store, measure and clean endodontic hand and rotary instruments within the operating field

It reduces the risk of cross-contamination and minimizes the passing of sharps between dentists and staff.

Using the Endoring II organizer helps make endodontic procedures safer and faster.

Single Endoring II Premium Kit: 1 Endoring II assembly (blue), 1 standard metal ruler, 1 e-Foam insert combo pack (48 inserts), 1 pack Gelwells (48 single-use cups) and 1 EndoGel pack (12 1ml MicroDose tubes—USA kits only) 29-89881 **79.95**

E-Foam Blue Pack:
Single package of 48 foam inserts 29-89882 **30.95**

E-Foam Yellow Pack:
Single package of 48 foam inserts 29-89883 **30.95**

Endo Burs

Endo Carbide Burs (PacDent)

- 151Z can be used for initial endodontic access, sectioning, root separation, etc.
- 152EZ, features non-cutting safe-end tip

that prevents penetration of pulp chamber floor, enables easy access to root canals, comparable to Maillefer Endo-Z bur.
