* Most popular loupes for hygiene

** Most popular loupes for endodontic procedures

Based on a report in a 2003 Supplemental Issue of Access on Magnification Use In Dental Hygiene, Magnification loupes extend a dental clinician's career by decreasing the physical strains associated with achieving clear oral cavity visualization while providing superior patient care.

With Set and Forget™ optics, you do not have to be individually measured to get a custom fit. all miltex® optics allows you to Set your interpupillary, convergence and declination angle For perfect optical alignment. the optics are quickly and easily locked into your individual Setting So your loupes are always perfectly aligned.

Step 1: Choose your magnification: If you are a new loupes user, start with the lowest power you need. Most dental professionals begins units loupes with a magnification power of 2.5x. Remember, as the magnification transmission decreases

Step 2: Choose your working distance: All loupes are pre-set to focus at a certain distance and objects will remain in focus within a range of several inches around that pre-set point. Miltex® loupes are available in 4 working distances: Short (10-13"), Regular (12-16"), Long (14-18") and Extra Long (16-20").

The 250 Series (2.5x) is the highest ideal general purpose optic. The 250 series optic will provide a magnified view of approximately 2.5 times the object size. Most first time loupes users choose this magnification.

The 300 Series (3.0x) is an ideal optic for individuals who

have worked with a 2.5x magnification power optic and want to step up in power. The 300 series optic provides a view of the entire quadrant of the mouth and has an excellent depth of focus.

The 350 Series (3.5x) is the highest magnification available in a compound lens design. The 350 series optic is an excellent choice for dentists requiring high magnification in lightweight loupes.

Nano Loupe Light (Dentlight)

The most power per pound, and the smallest overall light on the market with the most power at its size of only 6 grams on headlamp and 87 grams on battery pack.

Focused Beam - Unlike other headlights, iZoom has no glares with its unique beam quality giving your patient the most comfort.

Constant Power - With unique heat sink technology and constant current LED driver, Dentlight Nano maintains power throughout the battery run time.

Reliable - With smart battery, cooling design, flexible wire and plug and start power driver, Dentlight Nano works any time you need it.

Smart and Robust Battery - Black anodized aluminum rechargeable battery weighs only 87 grams with seamless backlit membrane buttons that set three power levels and prevents cross-contaminations with easy to disinfect clip-on battery pouch.

Ease of Use and Adaptation - Fit to all major loupes including Orascopic, Zeiss, Designs for Vision, Surgitel and iZoom.

Kit Includes: slide-on composite filter, two battery packs, easy-to-clean battery pouch, universal charger, and loupe adapter with articulating arm that fits on all major loupes
