### Medseptic Skin Cream

Medseptic Skin Protectant is a superior moisturizer and protectant made with natural lanolin. Lanolin has been recommended by the Foot and Ankle Institute for diabetic patients to help hold moisture in their skin, especially on the feet, ankles, elbows and hands. Lanolin is absorbed by skin since it contains the same lipids that are found in our skin. Contains 50% USP approved lanolin (purest lanolin), an ingredient recognized in the clinical industry for its natural replenishing properties. Especially formulated to treat adult diaper dermatitis, denuded skin and minor burns. Ideal for diabetic patients. Medseptic Cream

### Remedy 4-in-1 Cleansing Lotion

Remedy 4-in-1 Cleansing Lotion cleanses, moisturizes, protects and nourishes the skin in one application. Optimizes shelf space and nursing time. Leaves skin feeling fresh and silky. No-rinse lotion formula easily cleanses and removes sticky barriers and pastes, avoiding unnecessary friction on the skin. Convenient trigger sprayer yields over 280 sprays. Added dimethicone helps protect skin. Ideal for light incontinence and to avoid transepidermal water loss (TEWL). Harsh soaps and surfactants strip skin of moisture and contribute to TEWL. Remedy 4-in-1 Cleansers have a phospholipid base that binds both water and nutrients to gently clean and condition the skin. Remedy cleansers contain ingredients derived from natural and organic oils that mimic the body's natural lipids. Remedy cleansers can also be used during showers in place of soaps. The phospholipids will gently cleanse the skin without stripping it from its natural oils. Olivamine is a blend of antioxidants, amino acids, vitamins and methylsulfonylmethane (MSM). These ingredients are all known to play a vital role in basic cellular construction and protection. Olivamine contains antioxidants like hydroxytyrosol, the most potent antioxidant known today (derived from olives). It also contains amino acids like L-proline, L-cysteine and glycine - three of the main building blocks of collagen. These components are also treated with photo-acoustic resonance to help minimize the tendency for in-
